

Presentation FOSTAC MAXIMUS®

Exclusive Product Presentation

What is FOSTAC MAXIMUS®

Purpose of the device:

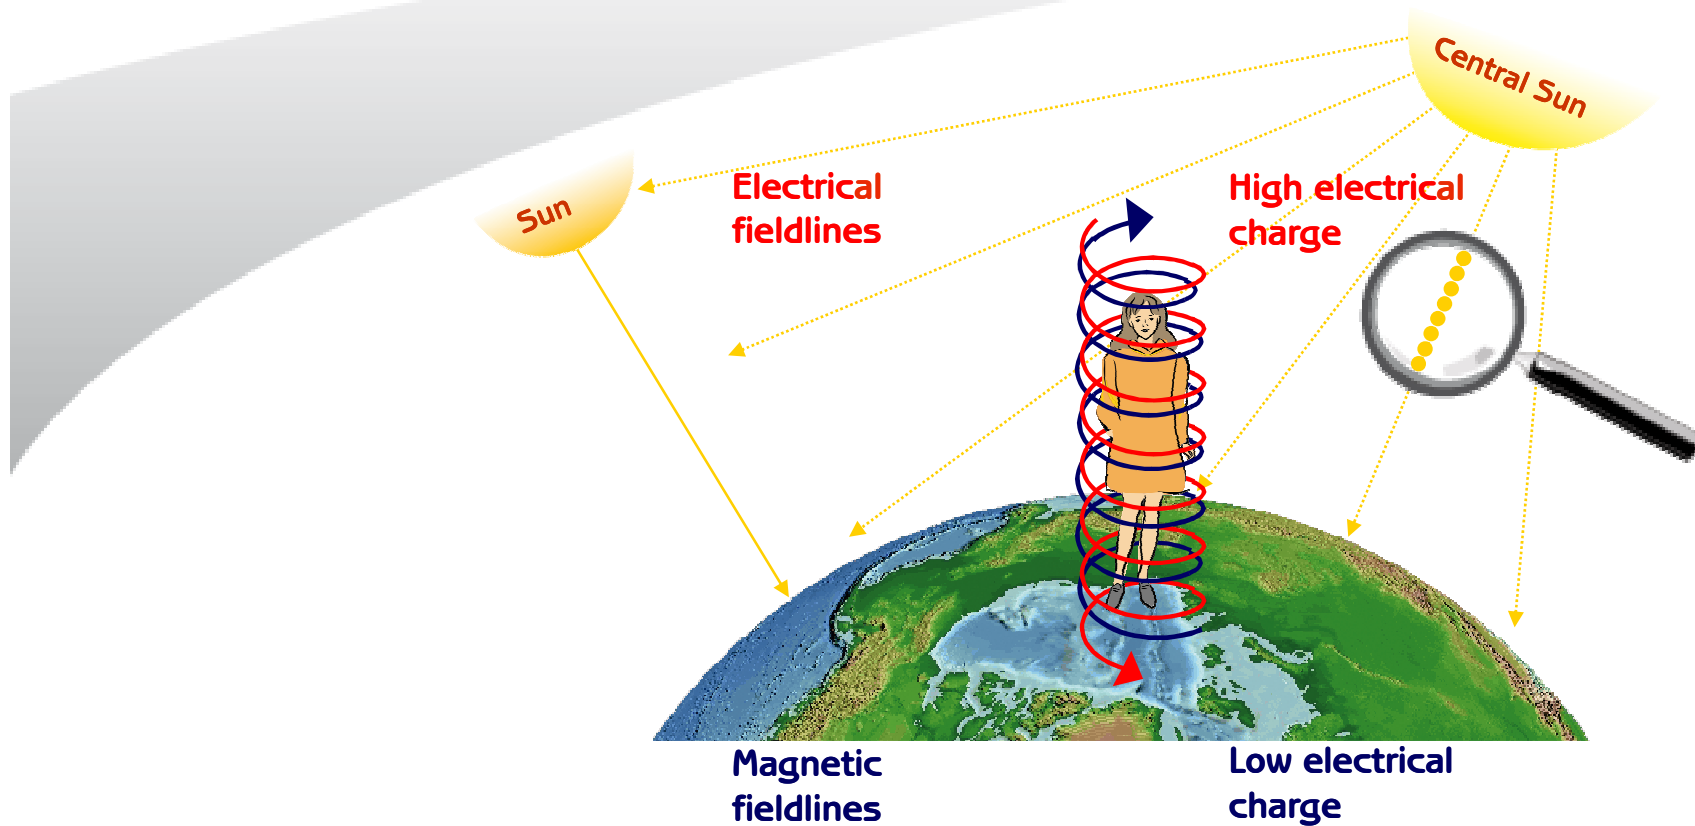

- Preserve natural resources
- Protect the environment
- Harmonize electro-smog
- Support health and general well-being
- Raise personal frequency levels
- Reduce electricity consumption & cost

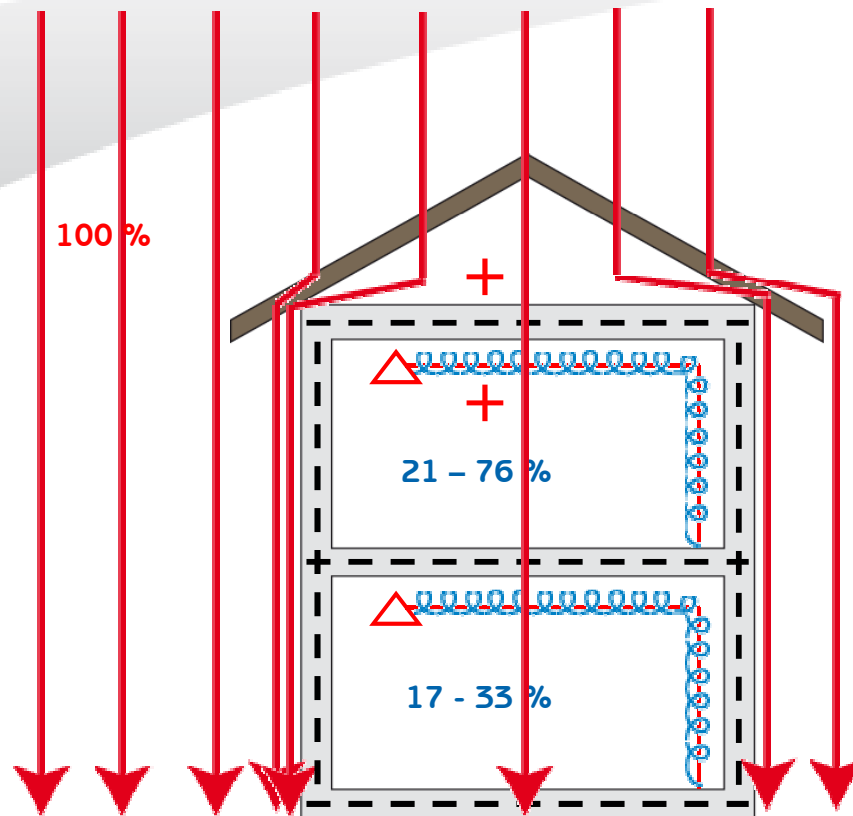

How does FOSTAC MAXIMUS[®] work?

- The FOSTAC MAXIMUS[®] is an expression of the consistent use of the laws of nature
- In nature we see a constant flow everywhere! Nature draws its life energy from the cosmos continuously. Here we need to distinguish between the energy from our sun and that of the central sun of the cosmos

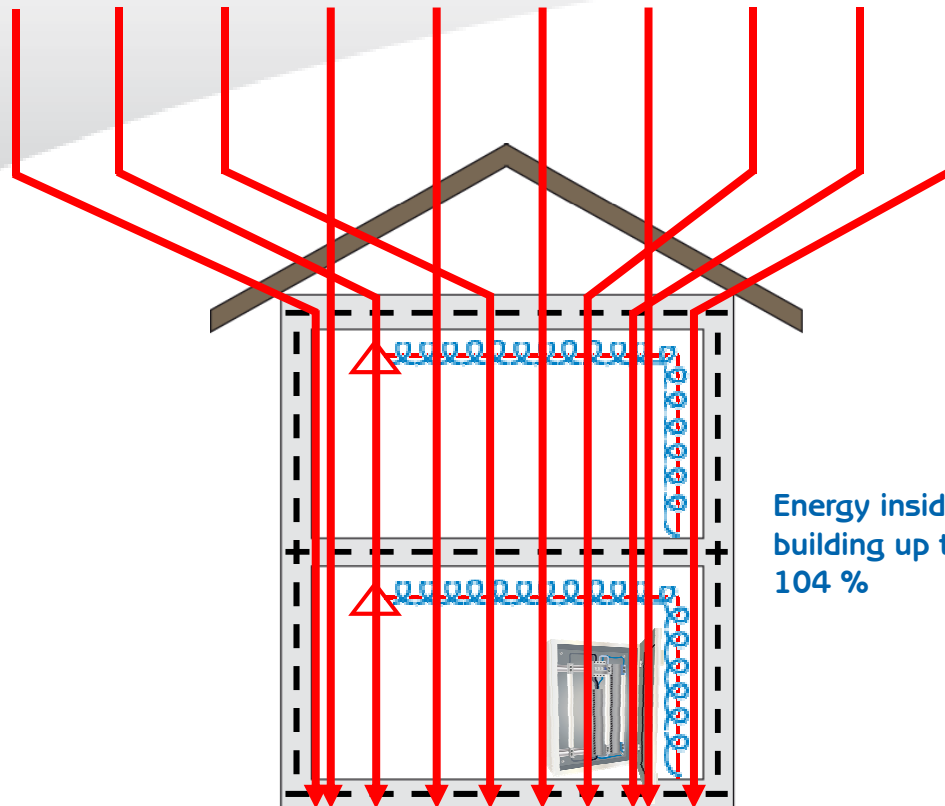

Diagram of the Earth's electro-magnetic field

Net energy flow in a building

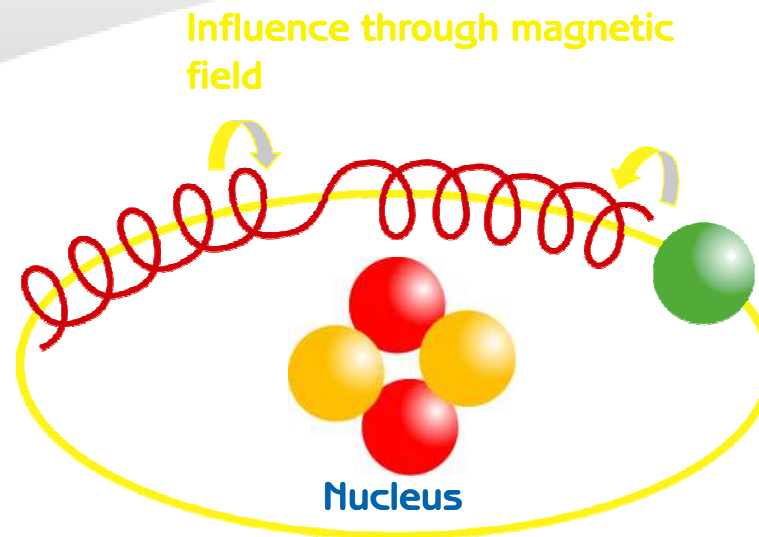

Energy flow with FOSTAC MAXIMUS[®]

Energy inside
building up to
104 %

Properties of electrons

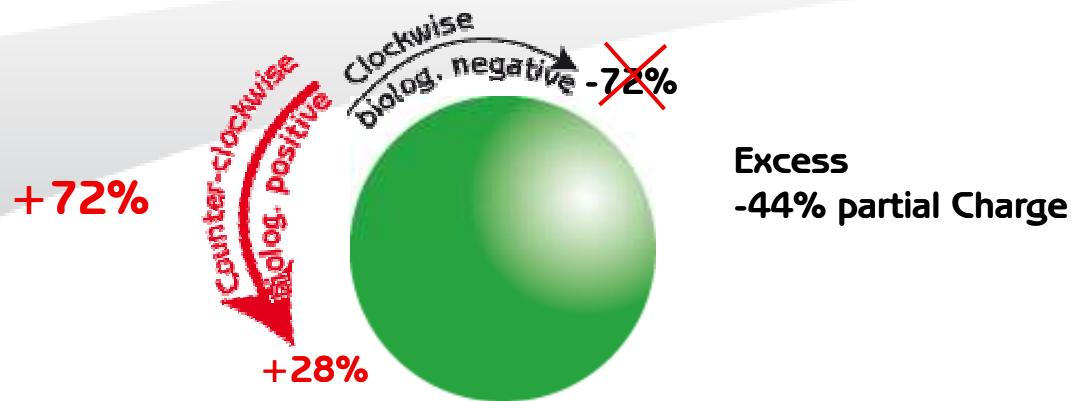

Electron spin
clockwise =
biologically unhealthy

Electron spin
counterclockwise =
biologically healthy

Electron spin in orbit

The electron in the electric current generated conventionally

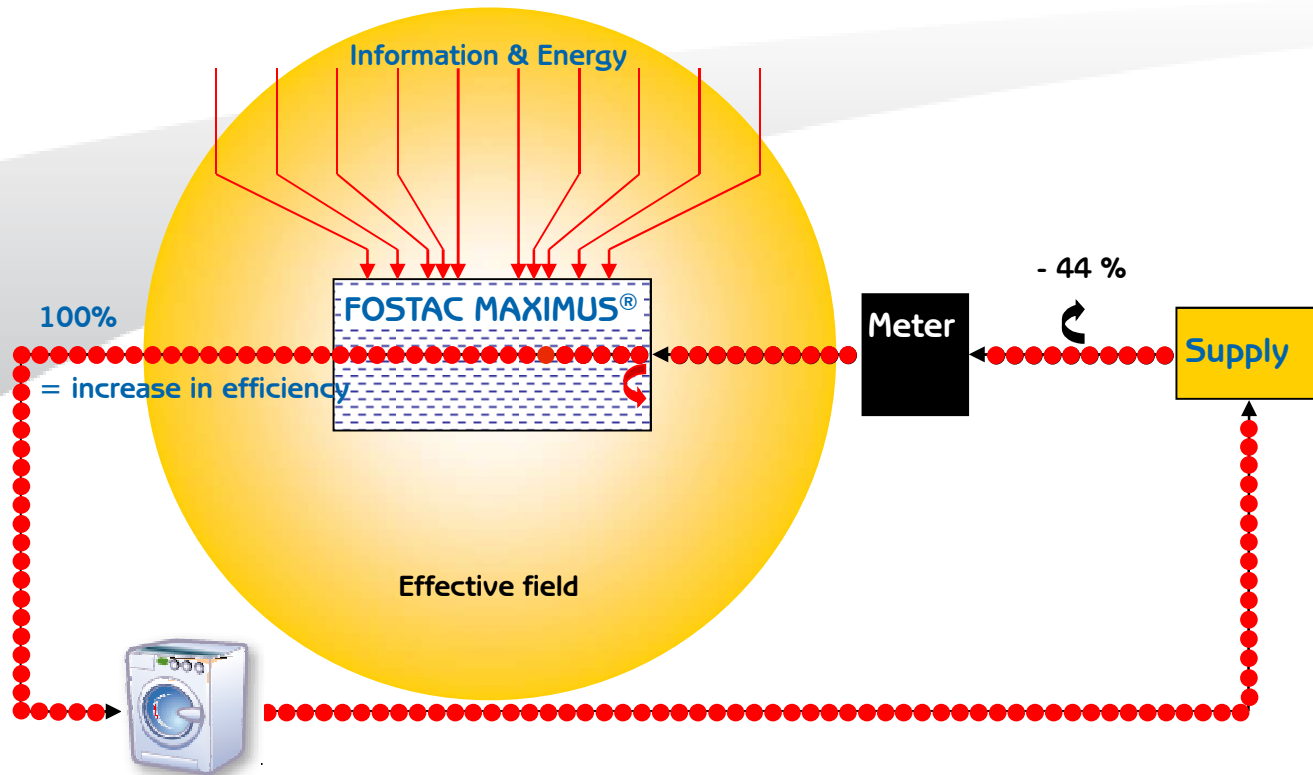

= 100 % Charge
 = Spin reversal
 = Spin acceleration

Clockwise rotation = energy withdrawal
 from the environment
 (breakdown, degeneration, illness)

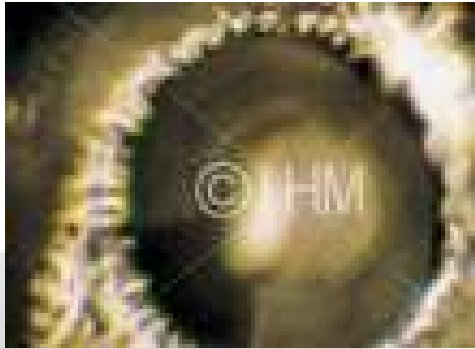

Counter-clockwise rotation = energy supply
 into the environment
 (build-up, maintenance, re-generation)

Effect of the FOSTAC MAXIMUS[®] in an electric circuit

Thanks to the increase in efficiency, the power demand can be met with decreased flow of electrons

FOSTAC MAXIMUS®

Applications for FOSTAC MAXIMUS[®]

- Family homes / apartments
- Commercial enterprises (SME)
- Industry, large scale business

Reports on FOSTAC MAXIMUS®

B.P. living in N. (DE)

In November 2008 we installed a FOSTAC MAXIMUS® P40 in our house.

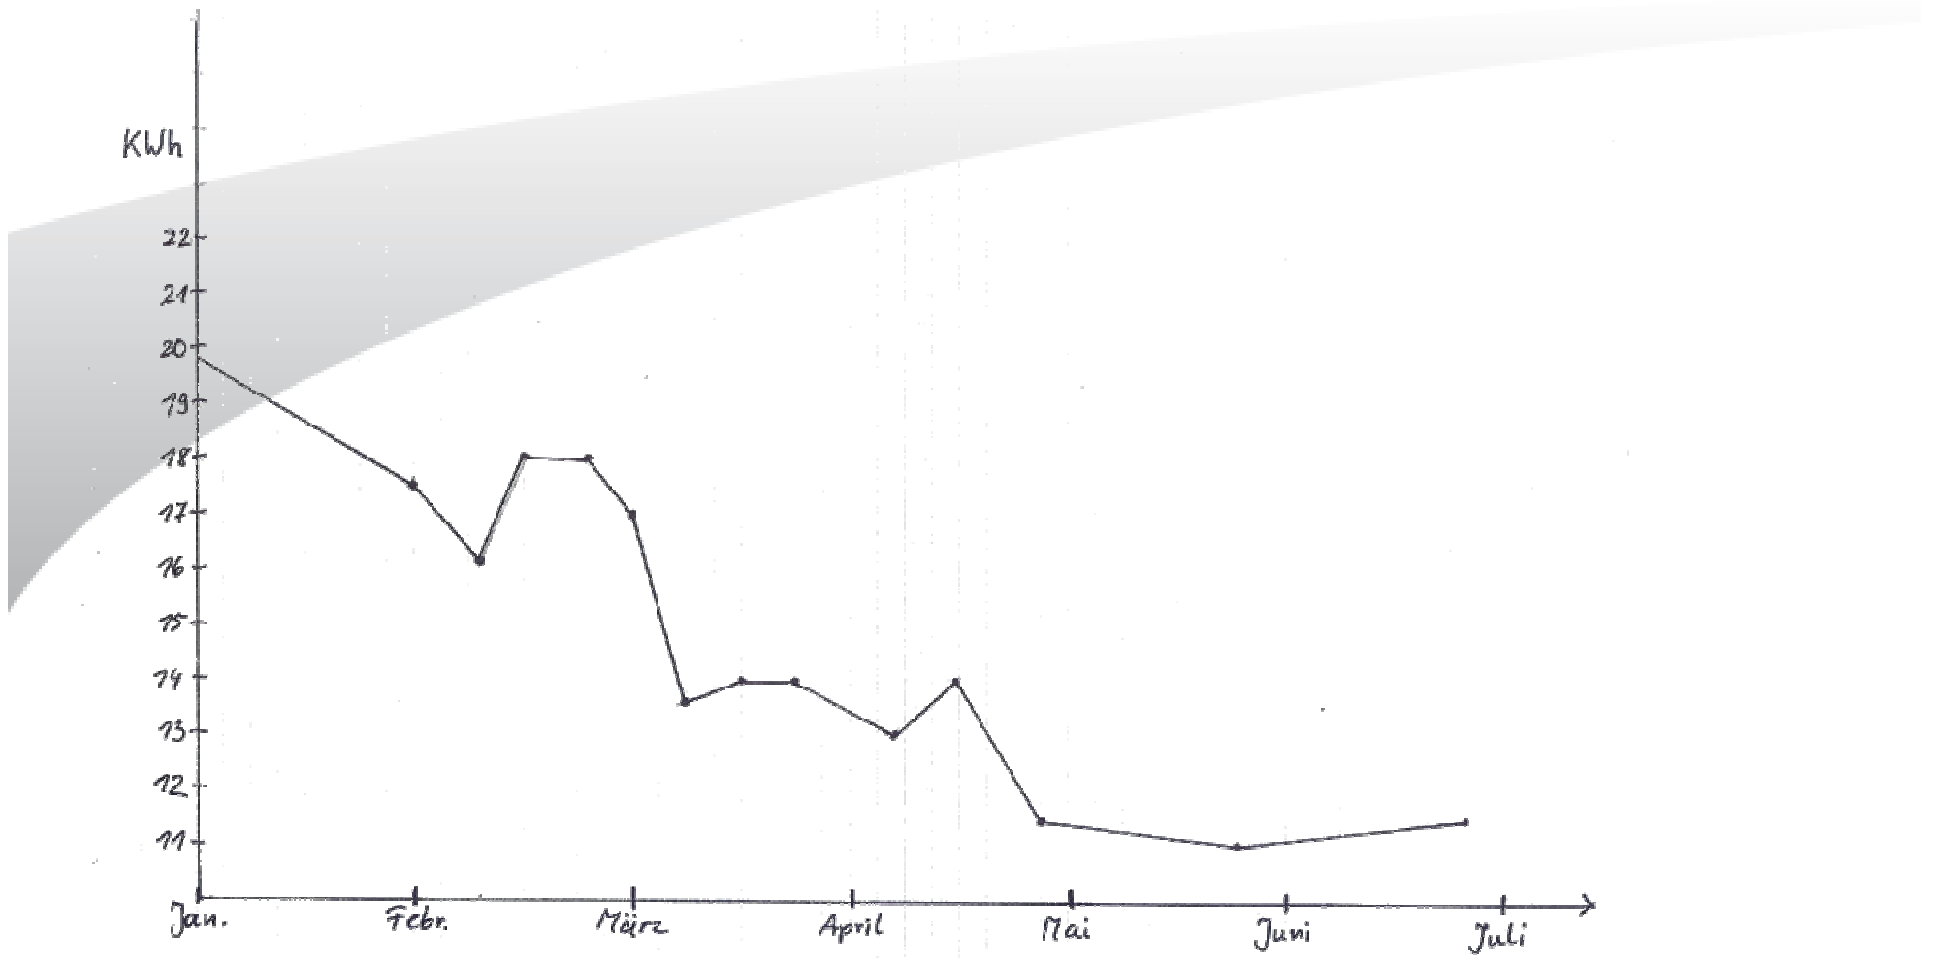

The following chart shows how our electricity consumption was affected.

On sunny days throughout the last year we kept a record of the power output of our solar panels installed on a nearby barn roof.

In May 2008 these values reached up to 35kWh per day.

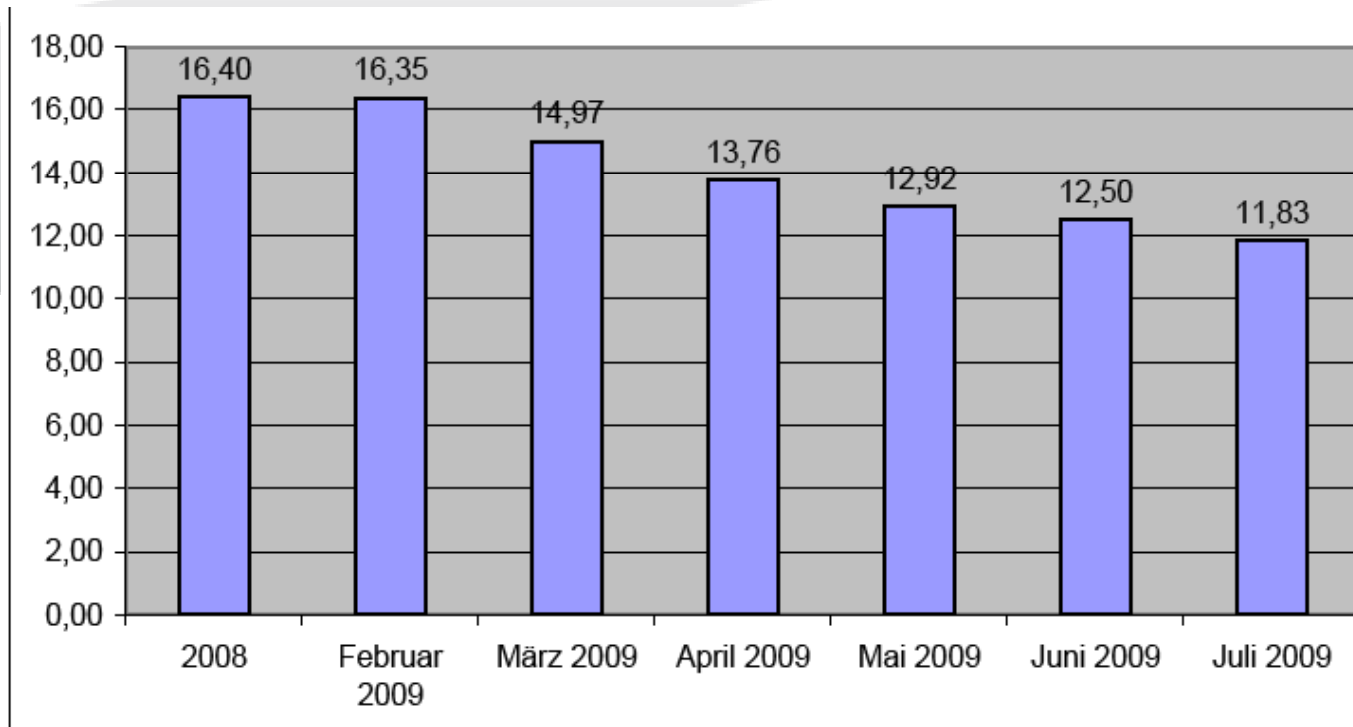

In 2009 these values peaked at **40 kWh** per day; an **increase** of about **14 %**

FOSTAC MAXIMUS® P40 at B.P's home in N. (DE)

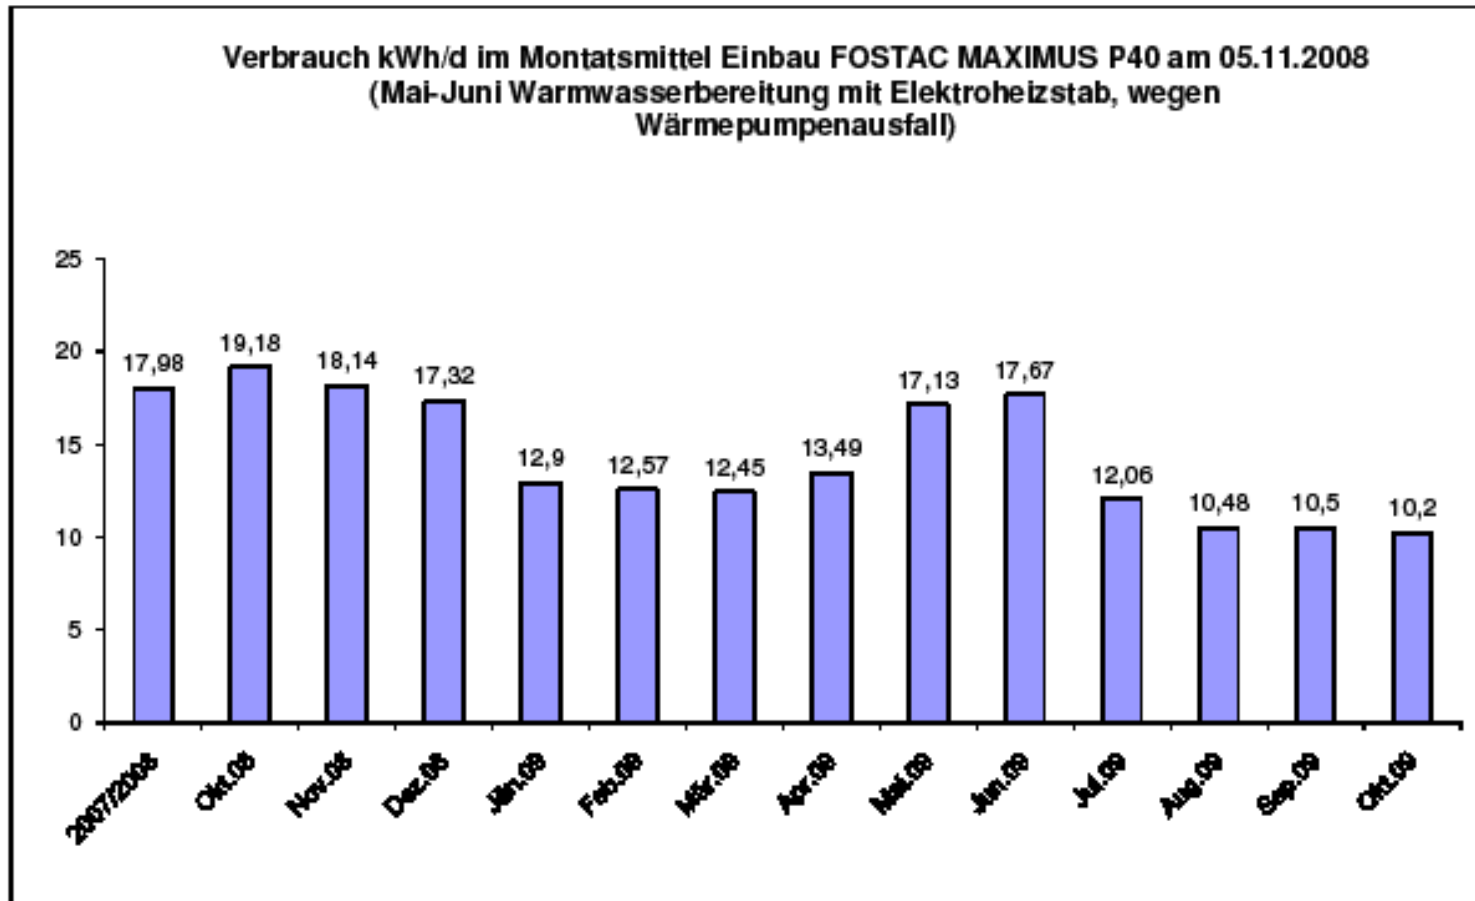

Case study, M. G., in G. (AT)

Monthly consumption (kWh/d)
FOSTAC MAXIMUS[®] M100W installed on 19.02.2009

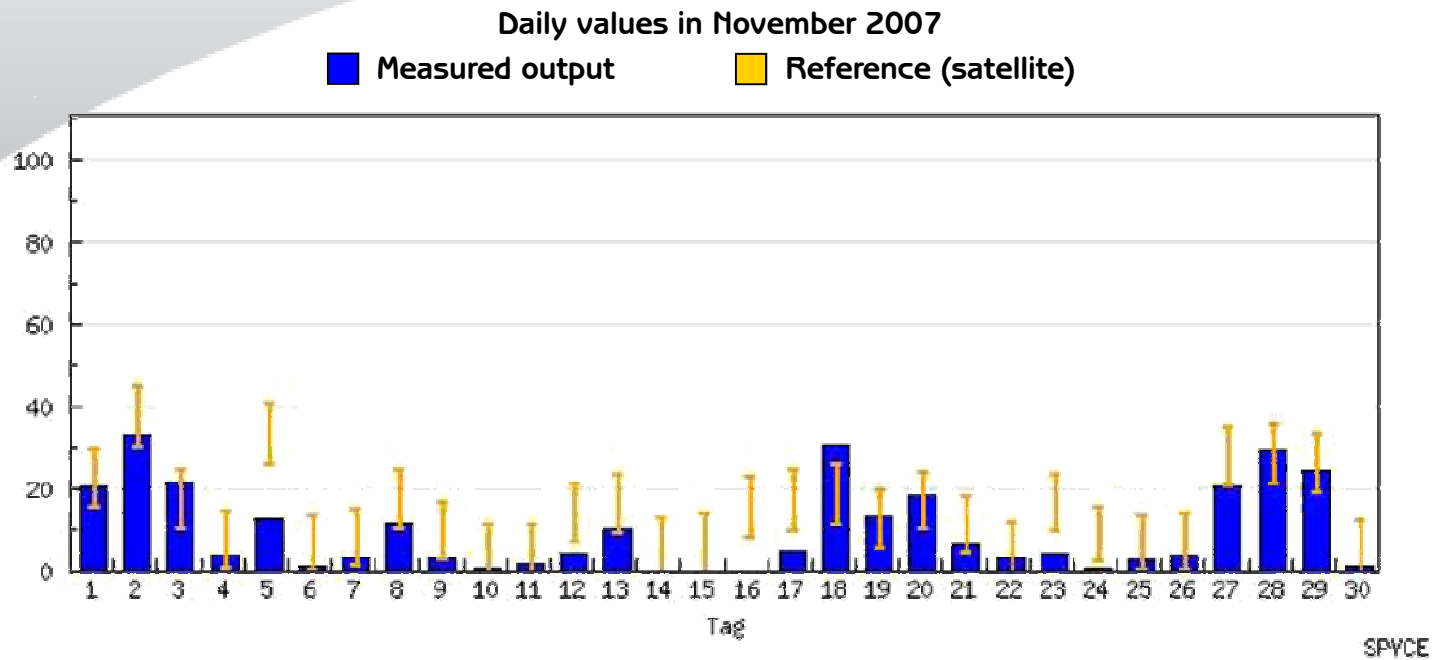

Case study, W.H., in W. (AT)

Case study, E. J., in B. (CH)

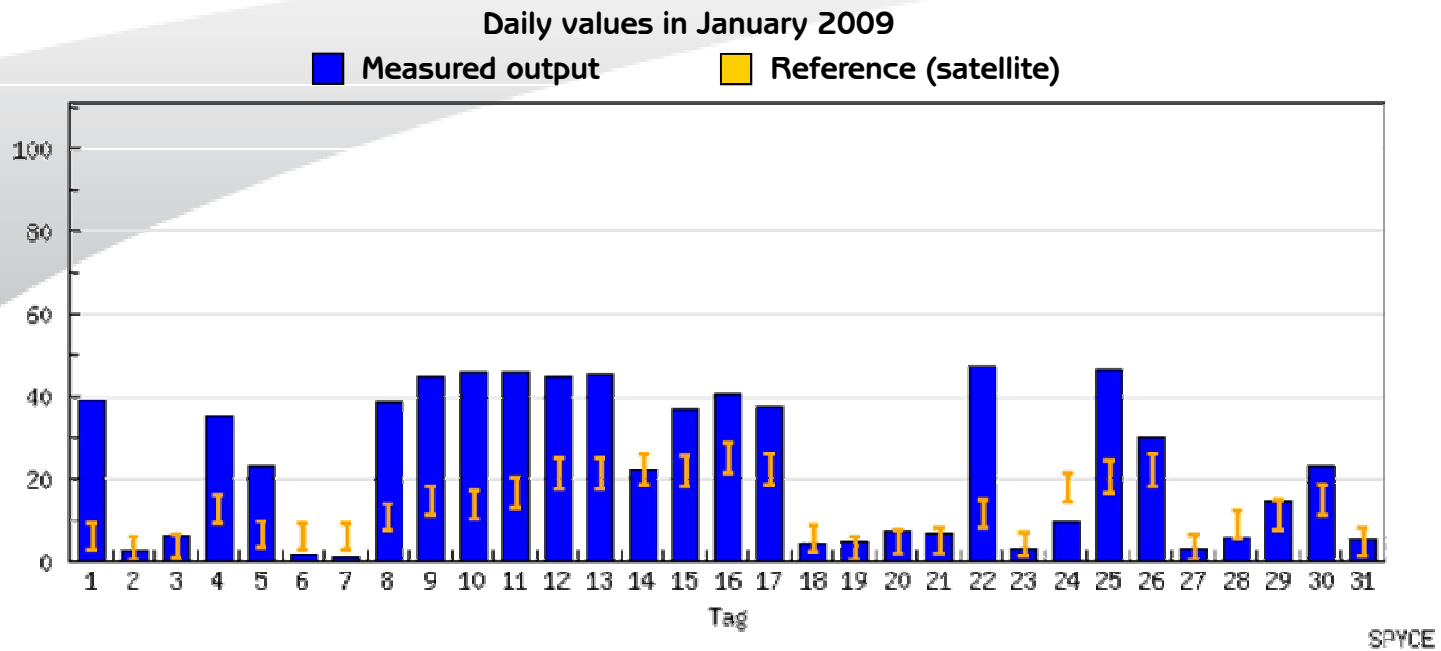

Installation of FOSTAC MAXIMUS[®] in private home in December 2007

Before installation of the FOSTAC MAXIMUS[®] the actual output of the solar panels generally reached about 70-80% of the calculated output based on available solar energy.

During 2008 the output steadily increased and since October 2008 the solar panels have generated more than 100% of the calculated output based on available solar energy.

In January 2009 this increased to **far more than 100%** of the calculated output!

The yellow lines indicate the expected output in kWh based on available solar energy calculated by satellite reference.

The blue bars show the actual output in kWh.

On the days with no output, the panels were covered with snow!

Case study, Engineering J. Mollerus GmbH, DE-88709 Meersburg

Good day gentlemen,

I am happy to confirm to you the effects of the FOSTAC MAXIMUS® in our company:

The equipment was installed in October 2008, and for six weeks we noticed no difference – until suddenly from December our power consumption, under exactly the same operating conditions as previously, first dropped by about 50% to 50 KWh/day, and then climbed back again to a daily consumption of 70 KWh. Since then the power consumption has leveled off at between 25% and 35% less than what it had been “before”.

Our Field Service Department, which in previous years has never received any business in the month of December, suddenly won three new orders in December 2008.

I wish you continued success, and remain,
Yours truly,
Rolf Frey
Managing Director

Production of FOSTAC MAXIMUS®

- **Swiss Product**
- **Name protected internationally**
- **Built according to the regulations of the Swiss Association of Electrical, Energy and Information technology (SEV), and approved in over 100 countries worldwide (compliance certification).**

Types and prices

| Device type | Price in CHF excl. VAT | Price in EUR excl. VAT (exchange rate 1.48) |
|-------------|---------------------------|--|
| P40 | 1'890.00 | 1'280.00 |
| M100W | 2'690.00 | 1'820.00 |
| M200W | 6'790.00 | 4'590.00 |
| M200 | 7'100.00 | 4'800.00 |
| M250W | 8'100.00 | 5'470.00 |
| M250 | 8'350.00 | 5'640.00 |
| M400W | 15'200.00 | 10'270.00 |
| M400 | 15'550.00 | 10'500.00 |
| M403 | 16'100.00 | 10'880.00 |
| M503 | 17'700.00 | 11'960.00 |

| M1000 | 26'500.00 | 17'905.00 |
| M1250 | 29'200.00 | 19'730.00 |

FOSTAC MAXIMUS®

Properties

- Maximizes natural energies (like an antenna)
- Increases the efficiency of electricity – increases its effectiveness
- Optimizes the flow of natural energy in buildings
- Harmonizes electro-smog
- Repolarizes watercourses and other geopathic interference fields mostly
- Long-life product with no wear and tear
- Cost-effective
- Maintenance-free, no moving parts
- Consumes no additional electricity
- Completely environment friendly
- Can be used in homes, offices, shops, commerce and industry
- Cutting-edge technology, for people and companies with vision

Maximum benefits for all users:

- Maximizes the natural energy in a building, up to 104%
- Increases personal well being – improves quality of life
- Optimizes the energy environment for animals and plants
- Improves the water quality in a building
- Reduces electricity consumption noticeably (15% to 25% on average – there may be variations above and below this)
- Optimizes electricity generation and increases power output in solar power, bio-gas, wind power, CHP, water power and other installations
- Reduces fuel consumption – lower fuel costs
- Reduces dependency on fossil fuels
- Conserves natural resources
- No additional costs for consumables, maintenance etc.
- Outstanding cost/benefit relationship
- Absolutely no risk: the right to return after two years with money-back guarantee *)

Quotes of renowned quantum physicists

Albert Einstein:

»Everything should be made as simple as possible.
But definitely not simpler!«

Fred A. Wolff:

»You are creating your own reality!«

Sir James Jeans:

»Today it is fairly unanimously accepted, and the world of physics is in complete agreement, that the flow of knowledge is heading towards a non-mechanical reality; the cosmos looks more and more like a big thought rather than a big machine.«

Conclusion

The traditional laws of physics – which apply to closed systems – cannot explain the operation of the FOSTAC MAXIMUS®.

We need to take a leap of faith, and recognize that the power of spirit penetrates and controls all matter.

In recent years our collective consciousness has begun to change in this respect, and Mankind today is ready to take this step.

All of us – the whole of Mankind – will benefit from this.

So – let's step forward confidently!
