Paul Polterauer	www.herosphere.gg

PRODUCT DESCRIPTION

PRODUCT/SERVICE

HEROcoin is the first cryptocurrency and ICO from Austria. It enables for trustworthy online gaming. The HERO blockchain ecosystem consists of game creators and players. Everyone is able to participate by simply joining or creating games. The whole community benefits from a growing number of activities as the system ensures that every HERO token holder receives a general reward of all played games. Additionally, those who take the effort to create games receive a provider reward. herosphere.gg will be the first used case that utilises the HEROcoin network. herosphere.gg is a platform that allows you to predict events that happen in e-sports games. Your predictions compete against your friends predictions or the whole community. It is also a great platform for streamers and influencers to engage with their followers.

PAIN POINT & SOLUTION

The online betting industry has suffered from a lack of innovation for years. Over time, player conditions constantly worsened: Fees have increased, odds are in favour of the bookmaker and regularly winning players are banned. Our solution is a player vs. player system. Users challenge their friends or the community instead of bookies.

ADVANTAGES OVER OTHER PRODUCTS

HEROcoin radically changes today's centralised way of online gaming. The token enables you to join or create games on the ethereum blockchain. We work hard to make herosphere.gg the best e-sports fantasy pooling platform and be the first product which uses HEROcoin.

FACT SHEET

TEAM & PEOPLE

Number of employees: 10

- **Founders:**
Paul Polterauer, Philipp Peinsold, Bernhard Blaha
- **CEO:** Paul Polterauer
