SKIDATA

Access Solution and Visitor Management

The Austrian company SKIDATA is a global leading provider of access, management and ticketing solutions for quick and safe access of people and vehicles. SKIDATA Australasia, the subsidiary of SKIDATA, has 2014 implemented an innovative solution at Miranda Westfield Shopping Centre. It shifts away from a traditional ticket based parking system to a ticketless parking solution which gives the shopper greater convenience. This cutting edge system relies on license plate recognition technology. It records the customer´s number plate details, logging their time of entry against the number plate which becomes the key identifer in lieu of a paper ticket.
