## PARTICIPATING COMPANIES

SUSTAINABLE DIGITISATION OF BUILDING PORTFOLIOS

LEGAL-TECH PLATFORM FOR ONLINE HATE PROTECTION

CONSULT&GO BUSINESS SERVICES

ETHEREUM NODE INSTALLATION, SETUP & MANAGEMENT TOOL

Thank you for visiting our ADVANTAGE AUSTRIA booth at the Reflect Festival. We are delighted to participate for the first time as a partner country at the largest technology and startup event in Cyprus. The Reflect Festival provides a great platform for Austrian startups and scale-ups to take their next internationalization steps with reach into the SEE and MENA regions up to India.

The event is part of go-international, a joint initiative of the Austrian Federal Ministry for Economy, Energy and Tourism and the Austrian Federal Economic Chamber.

Known for summer, sun, beach, and vacation, many of Austria's Born Global Champions do not have the island on their radar as an innovation location. However, in the latest EU Innovation Scoreboard, Cyprus has risen from "Moderate Innovator" to "Strong Innovator" over the past six years with a performance increase of over 35 points. In comparison, Austria gained 6 points. The country is implementing targeted reform efforts for innovation as part of the Recovery and Resilience Plan. Seven of the total 38 EU Innovation Excellence Centers are located in Cyprus, each assured funding of 30 million euros for a period of seven years. Additionally, Cyprus's strategic location as a bridge between MENA and Southeast Europe, along with its low tax burden and double taxation agreements with over 60 countries, including Austria, make it an attractive innovation hub.

Austrian companies and startups with innovative use cases – from AI-based digitisation of building portfolios and a legal-tech platform for online hate protection to consult&GO business services as well as a one-stop tool for Ethereum node installation, setup, and management – are represented at our AUSTRIA booth and the Reflect Festival. All of them have one thing in common: they are interested in seizing new cooperation and growth opportunities in Cyprus.

Let me close by wishing you fruitful cooperations with our participating Austrian companies. Καλές δουλειές!

Yours sincerely,

Christoph Sturm  
The Austrian Trade Commissioner

## Cloud NYNE GmbH

Hadikgasse 64, 1140 Vienna

T +43 699 101 98 200

E [up@nyne.cloud](mailto:up@nyne.cloud)

W [www.nyne.cloud](http://www.nyne.cloud)

© Cloud NYNE GmbH

Cloud NYNE is transforming the real estate industry by enabling the digitisation of existing building portfolios at scale. Using a combination of AI and advanced 3D scanning technology (LiDAR), the company creates highly accurate building information models (BIM) that serve as the basis for efficient renovation, asset management, and ESG-compliant operations.

In today's built environment, data gaps in existing properties lead to inefficiency, costly renovation surprises, and limited insights for long-term planning. Cloud NYNE bridges this gap by providing a scalable and automated solution for the fast and accurate digitisation of buildings.

This reduces manual work, increases transparency, and unlocks new potential for sustainability-focused decision-making.

## SUSTAINABLE DIGITISATION OF BUILDING PORTFOLIOS

The technology identifies architectural elements from point clouds and converts them into native BIM models (Revit, Archicad, IFC). These digital twins allow property managers, asset owners, and facility managers to remotely assess the condition, compare design and reality, and plan actions.

Whether the focus is on lifecycle management, ESG reporting, or modernising ageing building stocks, Cloud NYNE provides the solution tools to transform the customer's portfolio into a future-ready, data-driven ecosystem.

faresNetz phi GmbH "hateBlocker"

Hernalser Guertel 12A, 1080 Vienna

T +43 650 4454626

E [info@faresnetz.at](mailto:info@faresnetz.at)

W [www.hateblocker.io](http://www.hateblocker.io)

hateBlocker helps combat hate online and supports individuals, influencers, politicians, NGOs and companies that are the target of hate and harassment.

The platform uses advanced AI to scan digital content for insults and threats. Once the content is flagged, it is automatically documented in a legally valid format and assigned to one of the partner law firms for further action.

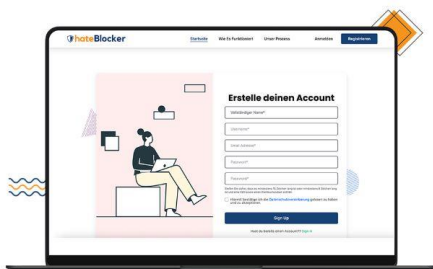

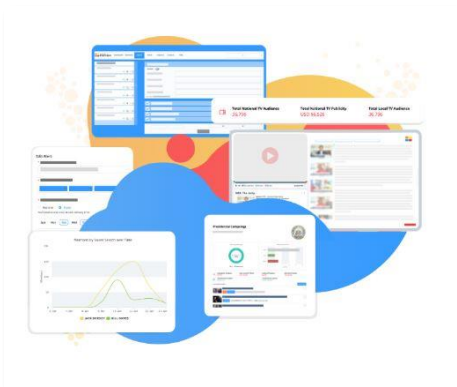

Victims do not have to deal with legal processes - hateBlocker takes care of everything from detection to enforcement. The AI makes it possible to react in good time even in the case of large-scale hate campaigns.

## FIGHTING HATE ONLINE WITH AI SUPPORT

Currently active in the DACH region and expanding throughout Europe, hateBlocker is building strategic alliances with law firms, technology providers and civil rights organizations and is looking for contacts and partners to combat hate online.

The open-source Stereum software enables easy operation of nodes in minutes. An Ansible engine installs dependencies, secures firewalls and coordinates updates without downtime. Modular plugins can be used to add DVT clusters and custom Grafana visualizations. Advanced APIs provide Prometheus metrics and remote signer endpoints.

Community governance and transparent code reviews guarantee tested releases. StereumPlus transfers this philosophy to the cloud, with ISO-certified data centers and full root access. Together, Stereum and StereumPlus form an innovation stack for the Ethereum ecosystem that democratizes staking and accelerates the deployment of dApps.

**OPEN SOURCE TOOLKIT FOR  
BUILDING AND MANAGING ETHEREUM NODES**

The offered services include:

- Node setup
- Ethereum node management with DVT
- Ethereum staking
- App development
- Chain analysis
- Cloud solutions
- Hosting Service
