I am delighted to welcome you to the CYPRUS-AUSTRIA B2B FORUM, organized by ADVANTAGE AUSTRIA in collaboration with the Cyprus Chamber of Commerce and Industry, the Enterprise Europe Network Cyprus, and the Cyprus-Austria Business Association. Our EU Recovery Mission from Austria, titled “Repower Cyprus,” reflects a broad spectrum of interests. The areas covered include energy transition, traffic management, water and environmental management, engineering, civil protection, digitization, software development, artificial intelligence, data science, and business services.

The EU Recovery and Resilience Plan for Cyprus offers a wide range of cooperation opportunities. This initiative brings together key stakeholders from both Austria and Cyprus to explore synergies across vital sectors, aiming to maximize the effective utilization of the available 1.2 billion euros in the best interests of both nations. More than three-quarters of these funds will be utilized over the next two years.

The event is fully supported by the Austrian Embassy in Nicosia and is part of ReFocus Austria, a collaborative initiative involving the Federal Ministry for European and International Affairs, the Federal Ministry of Labour and Economics, the Austrian Federal Economic Chamber, the Austrian National Tourist Office, and representatives from other federal ministries.

With a shared vision of innovation and progress, this mission not only strengthens bilateral ties but also ensures that the European Union’s goals for a greener, smarter more resilient future are realized. We are proud to support this collaborative effort and are confident it will create lasting partnerships that benefit both countries. Let us seize this moment to pave the way for a prosperous, sustainable future.

I’d like to wish you fruitful collaborations.
Καλές δουλειές!

Yours sincerely,
Christoph Sturm

PARTICIPATING COMPANIES

DIGITIZATION PROJECTS

BIOLOGICAL CONCENTRATES FOR OIL SPILL CLEAN-UP AND FIRE PROTECTION

PHOTOVOLTAIC PROJECT DEVELOPMENT AND PRODUCTION UNDER LICENCE

LARGE-SCALE PHOTOVOLTAIC PROJECTS

CONSULTING, PLANNING, PROJECT MANAGEMENT

ENERGY SOLUTIONS & SERVICES FOR POWER GENERATION AND COMPRESSION

BIOVERSAL International GmbH is responsible for the global distribution, consulting services, and marketing of the "BIOVERSAL® Advanced Biotechnology Product and Application". The "BIOVERSAL®" brand encompasses the development and production of the high-performance biological concentrates Bioversal HC, Bioversal QF, and Bioversal RC. There is already clear evidence that these products have been successfully implemented in the fields of industrial fire protection & safety, O&G, aviation and shipping, explosion protection, eco-hazard control, bioremediation, water treatment, and industrial cleaning. "BIOVERSAL®" is registered with the German Patent Office and the European Patent Office.

BIOLOGICAL CONCENTRATES

**Environmentally-friendly oil spill clean-up
and fire protection**

The principal products of BIOVERSAL® (Bioversal HC, Bioversal QF, and Bioversal RC) are high-performance biological concentrates. These concentrates require no hazard symbols and are more efficient and cost-effective than conventional synthetic fire-fighting foams or dispersants used to tackle oil spills in the sea, rivers, or lakes. BIOVERSAL® combines many advantages in one technology:

- Better fire-fighting and oil-repellent performance
- Biodegradability effects on oil and fuel spills
- Active protection of the environment
