WELCOME TO THE AUSTRIAN PAVILION AT FUTUREBUILD 2025

Let's build for the future with Austria!

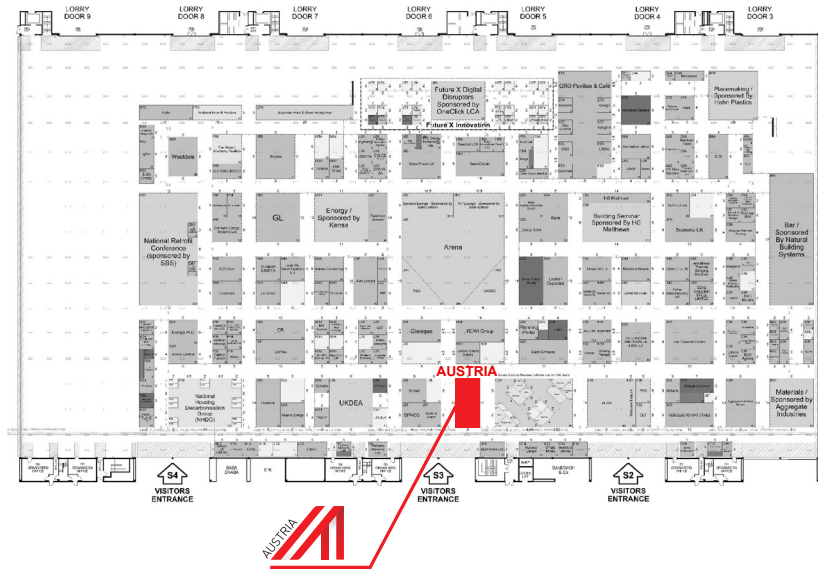

Welcome to the Austrian Pavilion at FUTUREBUILD 2025. This is our 18th time at this show as we strongly believe that Austrian sustainable building know-how, technologies and products can make a real difference in the UK building industry's net-zero efforts. Over the years we have seen multiple highly successful partnerships being formed and a number of excellent projects in the UK have received the Austrian Green Planet Building award.

Showcasing top Austrian innovators in construction, this year's stand features 7 world class technology and engineering partners. We invite you to take full advantage of this opportunity to meet and get to know industry experts from Austria. Specialists in the fields of passivhaus, renewable energy & heating, digital tools for building management, and water treatment will be on the stand. Whether you wish to find out how to increase efficiency using the latest innovation in piping systems or enrol on this year's Green Building Summer University in Vienna, you are assured of a warm welcome!

We look forward to taking the next steps together with you!

Michael Mueller
Trade Commissioner and Commercial Counsellor

BWT Holding GmbH
BWT House, The Gateway Centre Coronation Road
HP12 3SU High Wycombe, The United Kingdom
T +44 7834 0970 99
E enquiries@bwt-uk.co.uk
W www.bwt-uk.co.uk

The BWT – Best Water Technology – Group is a leading water technology company in Europe with a staff of more than 5,500, working on innovative, economic and ecologically friendly water treatment technologies to provide private households, industry, commerce, hotels and municipalities with the safest, healthiest and most hygienic water possible for their day-to-day needs.

BWT provides modern water treatment systems and services for drinking water, process water, pool water and, especially, WFI – water for injection for the pharmaceutical and biotech industry. The company's research and development staff works on new techniques and materials using cutting-edge methods to develop economical and ecologically friendly products. Employees work particularly hard to create products which use fewer resources and less energy, thereby reducing CO₂ emissions.

Holzleitner Herbert GmbH
Vinzenz-Kern-Strasse 1, 4694 Ohlsdorf, Austria
T +43 7613 903 08
E office@holzleitner-herbert.at
W www.holzleitner-herbert.at

Herbert Holzleitner GmbH is an experienced construction expert specializing in the building sector. As a master builder, Herbert Holzleitner plans and implements projects for both new constructions and renovations of commercial and industrial properties, private buildings, medical practices, law firms, restaurants, as well as exclusive garden designs and complex roof structures.

Additionally:

- Everything related to real estate analysis.
- Everything needed for the seamless integration of metal into buildings.
- Everything needed by customers for integrating glass structures into their construction projects.

OeAD student housing
Ebendorferstrasse 7, 1010 Vienna, Austria
T +43 1534 088 00
E housing@oead.at
W www.oeadstudenthousing.at/en

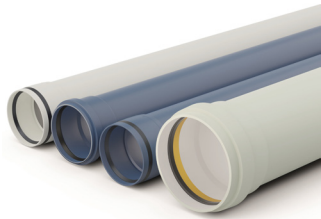

OeAD student housing is a non-profit student residence provider and offers accommodation for around 10,000 students annually throughout Austria.

While the main goal is to provide energy efficient, climate friendly and ecologically built student guest houses, the pioneer in passive house building cooperates with national and international universities and offers two academic summer programs: "Green.Building.Solutions." (GBS) and "Alternative Economic and Monetary Systems" (AEMS). Both start with climate change and continue with the topic of sustainability – the GBS in the building sector, and the AEMS with regard to economic and financial systems.

POLOPLAST GmbH & Co KG
Poloplaststrasse 1, 4060 Leonding, Austria
T +43 7323 8860
F +43 7323 8869
E office@poloplast.com
W www.poloplast.com

POLOPLAST develops, manufactures, and distributes primarily reinforced, multilayer plastic pipe systems. For 70 years, the innovative POLOPLAST pipe systems have proven themselves in various applications in building technology and civil engineering.

POLOPLAST stands for modern and sustainable building technology in the areas of building drainage and ventilation. At the municipal level, the company's pipes are used in public sewage engineering for wastewater disposal, as well as in specialized applications such as bridge drainage. The marine and industrial sectors also rely on the tailor-made specialty products from POLOPLAST.

BauMaster®

Master your
Construction Site

Softcreate IT GmbH
Staudach 10, 4863 Seewalchen am Attersee, Austria
T +43 7662 2999 810
E office@bau-master.com
W www.bau-master.com

Poor oversight in construction management puts project success at risk.

The solution is called BauMaster: all project information is consolidated in a "digital construction memory" to eliminate duplicate work and misunderstandings. BauMaster is the professional "all-in-one" software package for construction management, tailored to the requirements of construction project managers.

With BauMaster, all information can be captured, managed and shared in real time. The well-designed features – from construction logs and construction schedules to plan management – are specifically customised to the needs of construction managers.

BauMaster supports customers in completing their construction projects to high quality standards, on schedule, and professionally.

VERITAS Projekt- und Baumanagement GmbH
Tuerkenstrasse 15, 4061 Pasching, Austria
T +43 7229 626 40
F +43 7229 626 4010
E office@veritashaus.at
W www.veritashaus.at

VERITAS is a licensed timber builder from Austria, who is specialized in the construction of CO₂ neutral timber frame buildings.
This prefabricated construction method offers the customer many advantages, such as sustainability, cost efficiency, short construction time, etc.
