WELCOME TO THE AUSTRIAN PAVILION AT FUTUREBUILD 2023

The Mission Zero report published in January by Chris Skidmore MP reaffirmed the British Government's decarbonisation path to 2037 as set out in their Net Zero Strategy. The review highlights the opportunities building a green economy provides but also the dangers of procrastination.

The fight against climate change can only be won together. The importance and urgency of engagement and cooperation between all interested parties, from policymakers to businesses to consumers, both locally and internationally, cannot be overstated.

Recent world events have underlined the strong economic and environment argument for building resilient, sustainable and innovative supply chains and developing skills to deliver a green economy in practice.

Austria was an early adopter of long-term environmental planning. It has a highly developed ecosystem of green technology clusters and research centres. We are proud to acknowledge the part that Austrian companies have already played together with their British partners in developing green technology markets in the UK in areas such as timber engineering, low energy housing and renewable energy systems.

We invite you to meet new business partners on the Austrian Pavilion at Futurebuild (stand H13). Find out about the latest innovations from Austria for energy and resource efficiency, modular construction techniques, digitalisation and smart technology.

Join us on the Austrian Pavilion on Wednesday 8th March at 4pm for our networking co-hosted with the UK Passivhaus Trust.

We look forward to meeting you!

Christian Kesberg
Trade Commissioner in London

BEWISO | BEST WINDOW SOLUTION

BEWISO GmbH
Ringstrasse 7, 8410 Wildon, Austria
T +43 699 1075 4041
E office@bewiso.eu
W www.bewiso.eu

BEWISO - BEST WINDOW SOLUTION stands for innovative design and state-of-the-art technology made in Austria. Window solutions that meet the highest aesthetic standards, offer optimal living comfort, are environmentally-friendly and reduce energy costs.

BEWISO window designs reflect the window styles found in period properties, making them the perfect choice for listed buildings, as they effortlessly preserve the charm of historic facades. Slim and clear profiles in combination with double or triple glazing guarantee high energy efficiency and optimal living comfort.

OeAD student housing
Ebendorferstrasse 7, 1010 Vienna, Austria
T +43 1534 088 00
E housing@oead.at
W www.oeadstudenthousing.at/en

OeAD student housing is a non-profit student residence provider and offers accommodation for around 12,000 students annually throughout Austria.

While the main goal is to provide energy efficient, climate friendly and ecologically built student guest houses, the pioneer in passive house building cooperates with national and international universities and offers two academic summer programs:

"Green.Building.Solutions." (GBS) and "Alternative Economic and Monetary Systems" (AEMS). Both start with climate change and continue with the topic of sustainability – the GBS in the building sector, and the AEMS with regard to economic and financial systems.

Raimund Beck KG Wire Staples Company
Raimund-Beck-Strasse 1, 5270 Mauerkirchen, Austria
T +43 7724 211 10
F +43 7724 211 120
E sales@beck-fastening.com
W www.beck-fastening.com

The family-owned company BECK is one of the world's leading premium manufacturers of fastening systems and innovative fastening solutions for a wide range of applications: from all kind of staples, pins to collated nails and nail screw fasteners and the corresponding pneumatic tools.

With LIGNOLOC®, BECK offers the first collated nail system made from the renewable raw material wood, which combines perfectly performance and sustainability and thus enables a whole new way of building. Ideal for all timber construction companies who want to build their projects metal- and glue-free.

Redbloccsystems GmbH
Eferdingerstrasse 175, 4600 Wels, Austria
E info@redbloccsystems.com
W www.redbloccsystems.com

Redbloccsystems offers a highly profitable precast system that pays for itself within a very short time. The high-quality prefabricated panels can be efficiently and economically made from ceramic bricks, silica blocks, aerated concrete blocks (ACC-blocks), concrete blocks and other mineral building materials.

Advantages:

- proven redbloc precast technology
- „just-in-time“ production
- high quality and precision
- exact cutouts (sloping roof elements, windows etc.)
- short construction times
- calculable costs
- all types of buildings are possible (single family houses, apartments, commercial buildings)

Redbloccsystems combines the outstanding advantages of solid construction in terms of living quality, sustainability, thermal and sound insulation and other physical building properties with the increase in efficiency of the prefab construction method.

Redwell Manufaktur GmbH
Am Oekopark 3, 8230 Hartberg, Austria
T +43 3332 611 05
F +43 3332 611 0514
E office@redwell.com
W www.redwell.com

Redwell Manufaktur GmbH is an Austrian company specialising in the development and production of the highest quality infrared heaters. Made in Austria is not only a quality criterion, but a lived reality.

The successful company manufactures all products entirely by hand with 100% green electricity. Redwell prioritises energy efficiency and environmental protection by placing the highest demands on materials and workmanship. A Europe-wide, independent network of sales partners offers the expertise of dedicated specialist dealers in many places.

SHERPA Connection Systems GmbH
Badl 31, 8130 Frohnleiten, Austria
T +43 3127 419 83
F +43 3127 209 45 218
E office@sherpa-connector.com
W www.sherpa-connector.com

SHERPA Connection Systems GmbH is a company which got founded in 2012, that set itself the task of offering innovative connection technology for timber construction. The products are distributed by partner traders worldwide in over 30 countries.

The system solutions offer a high degree of load-bearing capacity and safety and also cover the fire and noise protection requirements.

The broad product family delivers a tailored, secure and economic solution for any task. The high level of prefabrication and the rapid assembly of these standardised connectors guarantee economic implementation of the most varied projects.

Ulson Trading e.U.
Hettenkofergasse 18-22/5/5, 1160 Vienna, Austria
T +43 650 4090 600
E mail@ulsontrading.com
W www.ulsontrading.com

ULSON TRADING is a specialised supplier of innovative components for sanitary installations. The range includes punching tools for stud wall profiles and plumbing boxes that simplify plumbing projects and shorten installation times.

ULSON TRADING was founded in 2020 and has 3 employees. All supplied products are developed and manufactured in Austria.

The company has been increasing its focus on sales in the United Kingdom, Ireland, Greece, Lithuania and Romania since March 2021.
