Thank you for visiting our ADVANTAGE AUSTRIA stand at the 31st International Fair Agrotica. We are delighted to participate once again in the largest trade fair for the agricultural economy—not only for Greece, but also for the entire Balkan region and Southeast Europe.

Six leading Austrian companies in the fields of wood-chippers, big bag dispensers, organic waste upcycling, business consultancy, agricultural construction, and ventilation systems are represented at our stand. All of them share one common goal: they are seeking new co-operation opportunities in Greece.

I am very optimistic that the Greek primary sector—contributing a gross value of 8.9 billion euros annually to the country's GDP, closely interconnected with the local food industry, and supported by a new generation of enthusiastic, highly educated, and strongly motivated agricultural professionals—will play a major role in Greece's commitment to a sustainable growth path.

Austria is here and ready to walk this path together with its Greek business partners.

Let me conclude by wishing you successful collaborations with our participating Austrian companies.

Καλές δουλειές!

Yours sincerely,

Christoph Sturm
The Austrian Trade Commissioner

PARTICIPATING COMPANIES

WOODCHIPPERS

FLEDBAG - DISPENSER FOR BIG BAGS

PLANTS FOR THE TREATMENT AND UPCYCLING OF ORGANIC RESIDUAL WASTE

BUSINESS CONSULTANCY

SILOS, CIRCULAR TANKS, PREFABRICATED BUILDINGS AND HALLS

VENTILATION SYSTEMS FOR AGRICULTURE

Eschlböck Maschinenfabrik GmbH

Grieskirchner Str. 8, 4731 Prambachkirchen

T +43 7277 2303

E office@eschlboeck.at

W www.eschlboeck.at

© Eschlböck Maschinenfabrik GmbH

Under the brand name BIBER, the upper Austrian family business Eschlböck develops and produces wood chippers. Eschlböck provides the largest product program throughout Europe by offering 12 construction sizes and more than 40 models, ranging from chippers for 15 cm wood diameter to chippers for up to 95 cm wood diameter.

The power transmission of the BIBER Powertruck technology developed by Eschlböck enables a high-power transmission from the truck engine to the chipper. The BIBER Powertruck series VICAN, VICTOR, MAROX and DUROX with up to 800 HP has been trend-setting on the market.

WOODCHIPPERS FOR BIOMASS CHIPPING

Eschlböck Maschinenfabrik offers solutions for entrepreneurs in biomass chipping, for forestry and plantation owners, landscaping, municipal use and clearing for pest control.

The wood chippers (powered by a tractor, truck or with an auxiliary engine) are suitable for producing wood chips for electricity generation or thermal utilization.

Eschlböck Maschinenfabrik is looking for users as well as technical dealers in the forestry sector.

FLEDBAG® – Big Bag Dispenser – Quality from Austria

With the innovative FLEDBAG®, you can empty the contents of big bags (FIBC) easily, quickly and precisely. Any residual amounts can therefore remain in the big bag and be emptied at a later date.

With the FLEDBAG®-Original for disposable big bags and the FLEDBAG®-Easy for reusable big bags, OMP Trade GmbH offers the right dispenser for every type of big bag.

FLEDBAG - THE FLEXIBLE DISPENSER FOR BIG BAGS

OMP is looking for distribution partners for FLEDBAG® products, in particular for FLEDBAG® big bag emptiers in Greece.

The company currently has no other distribution partner in Greece, so the potential new distributor would be the first on the market.

Advantages:

- Innovative product
- Attractive purchase prices
- Wide range of applications
- International dealer network
- Product with enormous market potential

REPLOID Group AG

Maria-Theresia-Str. 53, 2nd Floor, 4600 Wels

T +43 660 776 50 40

E office@reploid.eu

W www.reploid.eu

REPLOID Group AG operates in the industrial circular economy by breeding, processing and marketing insects.

In modular, container-based ReFarmUnits (RFUs), organic residual waste from agriculture and the food industry is converted into high-quality proteins, fats and fertilisers using the black soldier fly.

REPLOID supplies larvae, optimises feedstock, takes the products and markets them centrally to the pet food, animal feed and fertiliser industries.

PLANTS FOR THE TREATMENT AND UPCYCLING OF ORGANIC RESIDUAL WASTE

REPLOID develops and operates plants for treating and upcycling organic residual waste to produce high-quality insect products such as protein, oil and organic fertiliser.

The aim is to establish a sustainable circular economy in Greece through partnerships with agricultural, food and waste management companies.

Industry: Agriculture, Plant Engineering & Construction / Smart Factory

Ziehl-Abegg, Motoren + Ventilatoren Ges.m.b.H.

Poststraße 70, 4061 Pasching

T +43 7229 94149

E info@ziehl-abegg.at

W www.ziehl-abegg.at

ZIEHL-ABEGG (Künzelsau) is one of the world's leading companies in the field of ventilation, control and drive technology.

Examples of product applications include heating and cooling systems or cleanroom and agricultural systems.

As early as the 1950s, ZIEHL-ABEGG laid the foundation for modern fan drives: external rotor motors, which are still state-of-the-art worldwide today. Another area is electric motors, which provide propulsion in elevators, medical applications (computer tomographs) or deep-sea underwater vehicles.

The high-tech company impresses with its high level of innovation.

VENTILATION SYSTEMS FOR AGRICULTURE

Increase production, reduce operating costs

Fascination, innovation and always being one step ahead of the future - this is what drives the globally active company in its areas of expertise: ventilation systems, control technology, drive technology and automotive.

Setting high standards for itself, Ziehl-Abegg plans for targeted growth, profitability and the future with a consistent sense of proportion and the premise of preserving an environment worth living in for future generations.
