Thank you for visiting our ADVANTAGE AUSTRIA stand at the 9th Infrastructure & Transport Conference. We are delighted to participate at this important event for two of the most crucial sectors of the Greek economy.

The 5 leading Austrian companies, which we represent at our catalogue stand specialize in Railway Infrastructure, Business Consulting & Services, Mining & Mineral Processing, Road Safety Infrastructure, Industrial Engineering & Manufacturing. Already well established in Austria and abroad, they all have one further thing in common: they are highly interested in new cooperation opportunities in Greece.

I am very confident that the infrastructure and transport sectors will keep on playing a major role in Greece's unstoppable growth. AUSTRIA is here and ready to go this way together with its Greek business partners!

Let me wish you a fruitful cooperation with our Austrian companies. Καλές δουλειές!

Yours sincerely,

Christoph Sturm
The Austrian Trade Commissioner

PARTICIPANTS OVERVIEW

GMUNDNER FERTIGTEILE GES.M.B.H. & CO. KG.
PRECAST CONCRETE SOLUTIONS AND RAILWAY CROSSING SYSTEMS

PLPG GMBH
CONSULT&GO COMPANY, SPECIALIZED IN BUSINESS SERVICES

SBM MINERAL PROCESSING GMBH
INTERNATIONAL FULL-SERVICE PROVIDER OF PROCESSING AND CONCRETE MIXING TECHNOLOGY

VOESTALPINE KREMS FINALTECHNIK GMBH
STEEL PRODUCT SOLUTIONS IN THE FIELDS OF ROAD SAFETY AND HIGH BAY WAREHOUSES

VOESTALPINE TURNOUT TECHNOLOGY ZELTWEG GMBH
TURNOUTS & SERVICES

GMUNDNER FERTIGTEILE Ges.m.b.H. & Co KG was founded in 1972 and is the patent holder and producer of the BODAN level crossing system.

It is used by state-owned and private railway companies worldwide.

BODAN is a modular level crossing system. It is suitable for all types of rails, sleepers and fastenings. The use of polymer concrete guarantees an extremely high load-bearing capacity under heavy traffic loads as well as a long permanent way lifespan. Additional advantages include the easy exchange of individual panels, low maintenance costs, ventilation of the track due to the bridging design, all panels withstand the effects of oil, acids, lyes, water, frost and de-icing salt.

BUSINESS OPPORTUNITIES

BODAN MODULAR LEVEL CROSSING SYSTEM FOR RAILWAY, TRAM AND METRO

GMUNDNER FERTIGTEILE produces prefabricated reinforced concrete parts for use in the traffic sector and in power supply. BODAN level crossing systems are required to cope with the necessities of two entirely different kinds of traffic and transport system. On the one hand there are the demands of rail-bound traffic (elastic trackwork), on the other the constantly changing demands of road traffic. Areas of application are for example: metros and trams, underground (entire railway and infrastructure sector), private railways, ports and all industrial companies with a rail connection.

Company is looking for: customers

Industry: Rail Transportation Infrastructure/Below Ground Engineering

PLPG GMBH
CONSULT&GO COMPANY, SPECIALIZED IN BUSINESS SERVICES

PLPG GmbH

Ybbsstraße 35/ Top 13, A-1020 Vienna, Austria
