NIOUS

“What does Austria actually sell in Greece?”

Have a look at the showcase in ADVANTAGE AUSTRIA's Athens office. Experience the high quality, diversity, and excellence Austria offers across all sectors to the Greek market—all in one place.

ADVANTAGE AUSTRIA
AUSTRIAN EMBASSY – COMMERCIAL SECTION

W www.advantageaustria.org/gr

Thank you for visiting our ADVANTAGE AUSTRIA office and exploring our product display showcase!

Since the beginning of my tenure in Athens back in October 2021, one of the most frequently asked questions I've received from our visitors was, 'What does Austria actually sell in Greece?'

To answer this question in a visually appealing way and to showcase the diversity and quality of the Austrian economy, my team and I conceptualized the idea of this display in the entrance area of our office.

When this simple idea turned into a project and was shared with our Austrian business community in Greece, it exceeded our wildest expectations.

Our showcase features more than 40 top Austrian companies represented in the Greek market. Leading Austrian companies from virtually all sectors — Industry, Machinery, Materials, Construction, Infrastructure, Mobility, Technology, Health, Services, Creative Industries, Food, Retail, Consumer Goods, Energy, Sustainability, and Natural Resources — all in one place. There's barely a big name missing.

All these companies have a proven track record in the Greek market, providing state-of-the-art solutions in their respective fields.

We are delighted to continue their journey alongside their Greek business partners and seek new opportunities for fruitful cooperation in Greece. I am genuinely optimistic about their continued successful trajectory and value-adding activity for the Greek and Austrian economy.

Let me close by wishing you fruitful collaborations with the showcased Austrian companies.

Καλές δουλειές!

Yours sincerely,

Christoph Sturm

Rockmore International is truly a global company with rock drilling tool manufacturing facilities located in Wilsonville, Oregon, USA, and Judenburg, Austria. We have an aggressive distribution network with a presence in North and South America, Australia, Africa, Europe, and Asia.

Our manufacturing operations are state-of-the-art, each one servicing various parts of the world based on proximity to our distributor network and end-user drilling operations. With a global information network, we are able to provide fast service and solutions to the drilling, mining, and construction industries.

Our key sales and support people – some of whom have served nearly thirty years in the construction and mining industries – are highly trained in the latest rock drilling technology and can offer you expert advice on what products will best fit a specific end-use application. We develop our drilling tools based on the continuous input of operators and contractors working in the field. Our distributors meet the high demand for our quality products by rapidly providing their customers with the exact rock drilling tools they need.

Rockmore International's rock drilling tools are used in mining, construction, tunneling, quarrying, and water well projects around the globe. The map above highlights the locations of a few projects that incorporate Rockmore's quality tools and accessories into their rock drilling operations.
