

Avantor ,delivered by VWR

Laboratory Solutions for Water, Wastewater and water treatment plants

Full range of equipment, laboratory furniture, consumables and chemical reagents needed for Water Analysis.

Laboratory equipment:

- a. portable and bench multiparameters for determination of pH, conductivity, turbidity
- b. portable and bench spectrophotometers & photometers for determination of water quality from inlet & outlet of a water & wastewater treatment plant, such as: ammonium, free & total chlorine, nitrate, nitrite, phosphate, COD, surfactants, nitrogen, iron, etc..
- c. ovens, standard and BOD incubators, microscopes, autoclaves
- d. Digestions for the determination of trace metal, COD, cyanide and sulfide content
- e. Jar Test for flocculation and coagulation

Projects in the field of drinking water and wastewater

Wastewater treatment plant Hoghiz, Romania (CORAL)

Drinking water treatment plant Vaslui, Husi and Barlad, Romania (CORAL)

Drinking water treatment plant Taia (CORAL)

Drinking water treatment plant Nisiporeni, Moldavia (UNIHA),

Drinking water treatment plant Cantemir, Moldavia (VEOLIA/SADE)

Drinking water treatment plant BOUAKE , Côte d'Ivoire (VEOLIA/SADE)

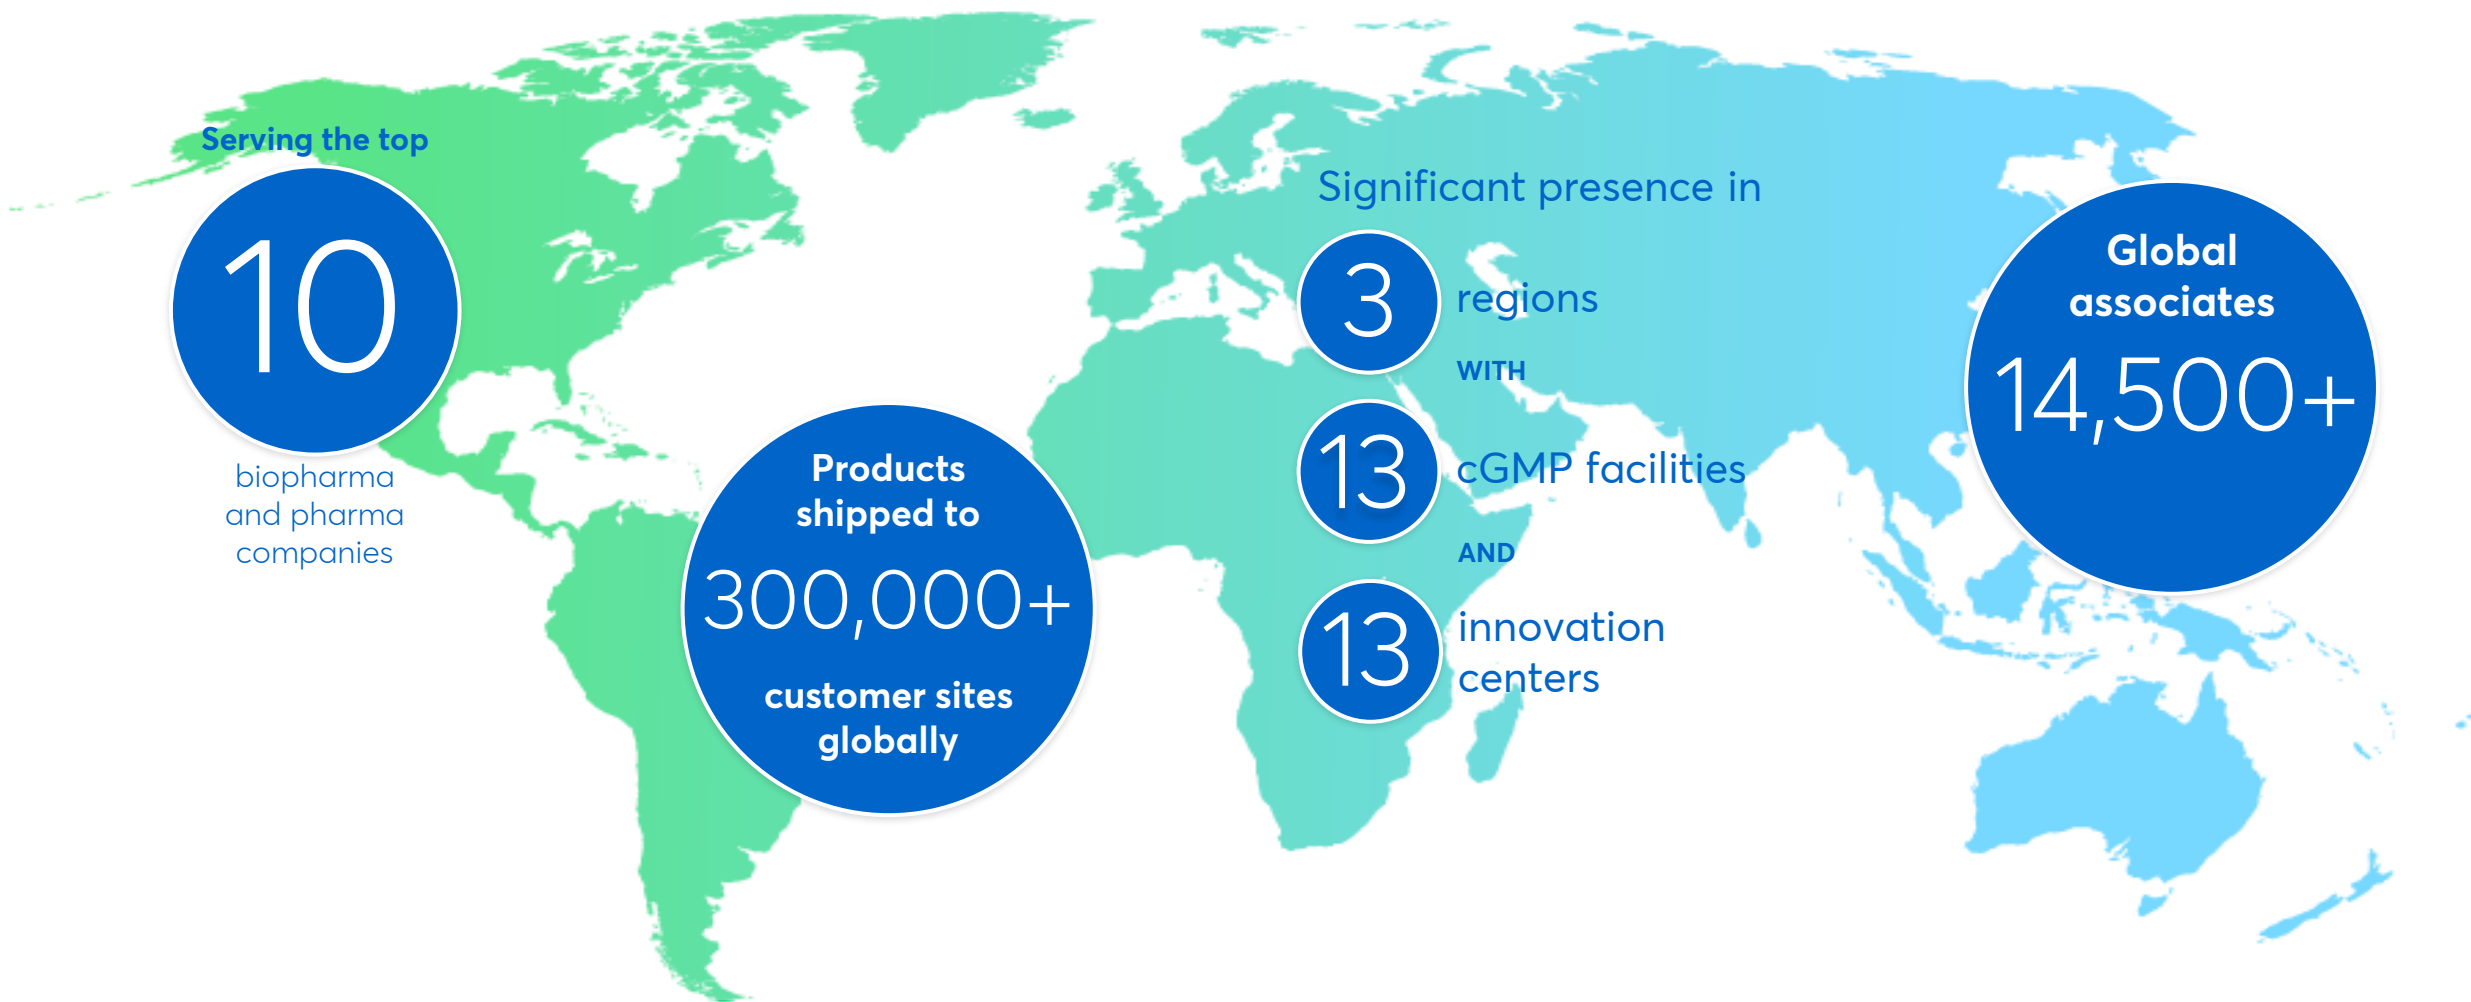

Waste Water Treatment Plants Tslatubo and Telavi, Georgia (VEOLIA/SADE)

Waste Water Treatment Plants Hunedoara, Romania (STRABAG))

Geographic footprint supports customers in 180+ countries

World-class network of manufacturing, research, distribution and customer service resources

Unique expertise and capabilities set Avantor apart

SCOPE OF PRODUCTS & SERVICES

Comprehensive offering

On-site services

High purity products

TECHNICAL EXPERTISE

Co-innovation with customers

Downstream processing

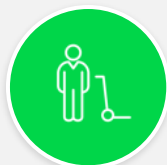

Quality & regulatory expertise

NETWORK & INFRASTRUCTURE

cGMP manufacturing

Global distribution

Broad supplier network

GLOBAL CUSTOMER ACCESS

Leading eCommerce & digital capabilities

Global commercial team

Consortium relationships
