## Join the Dynatrace Team

# Because the world needs software to work perfectly.

We are one team: we share goals, responsibilities, and decision-making powers. We aren't all the same, and therefore we benefit from our differences. We have the type of curiosity which drives us to go beyond obvious solutions and to shape the future. If we face setbacks, we do so together; exploring the reasons and finding a new approach. We focus on the value and push boundries to stay one step ahead.

**Why Dynatrace?** At Dynatrace, we design & create smart software for monitoring application performance, system infrastructure, and user experience. We build an all-in-one Software Intelligence Platform that provides answers, not just data. Full-stack coverage, AI-powered and automated. The world's leading companies, such as Amazon, BMW and Delta Airlines, put their trust in us and our solution. Our work focused on value, as will yours if you join our team.

Technologies we work with:
- Practices – Agile Methods, DevOps
- Languages – Java, TypeScript, C++, JavaScript, C#, Golang, Swift
- Cloud – AWS, Microsoft Azure, Google Cloud Platform, Kubernetes
- Web – Angular

Our R&D Labs: Linz (Engineering HQ), Hagenberg, Vienna, Graz, Klagenfurt, Gdansk, Barcelona, Detroit, Boston, San Francisco
