

A low-angle, black and white photograph of several tall skyscrapers reaching towards a bright light at the top center, creating a dramatic perspective. The buildings are covered in windows and structural details.

# Welcome to Beyond by BearingPoint!

Nice to meet you – online.

Education- and Career Fair Croatia, 13.10.2021

**Beyond**  
by BearingPoint.

# Agenda

- Intro & what is Beyond? (2,5 min)

Elisabeth Ribisel  
HR

- Our Techstack (10 min)

## **Scrum, Container Based Techstack & the technical way we work**

Martin Brugger  
Senior Technology Architect

## **Serverless Framework**

Peter Moretti  
Technology Architect

- Internship, roles and working at Beyond (5 min)

Angelika Kölbl-Theußl  
HR

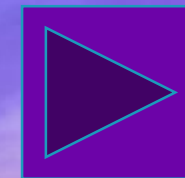

# What is Beyond?

Elisabeth

# Beyond by BearingPoint

A leading ecosystem orchestration and digital platform provider

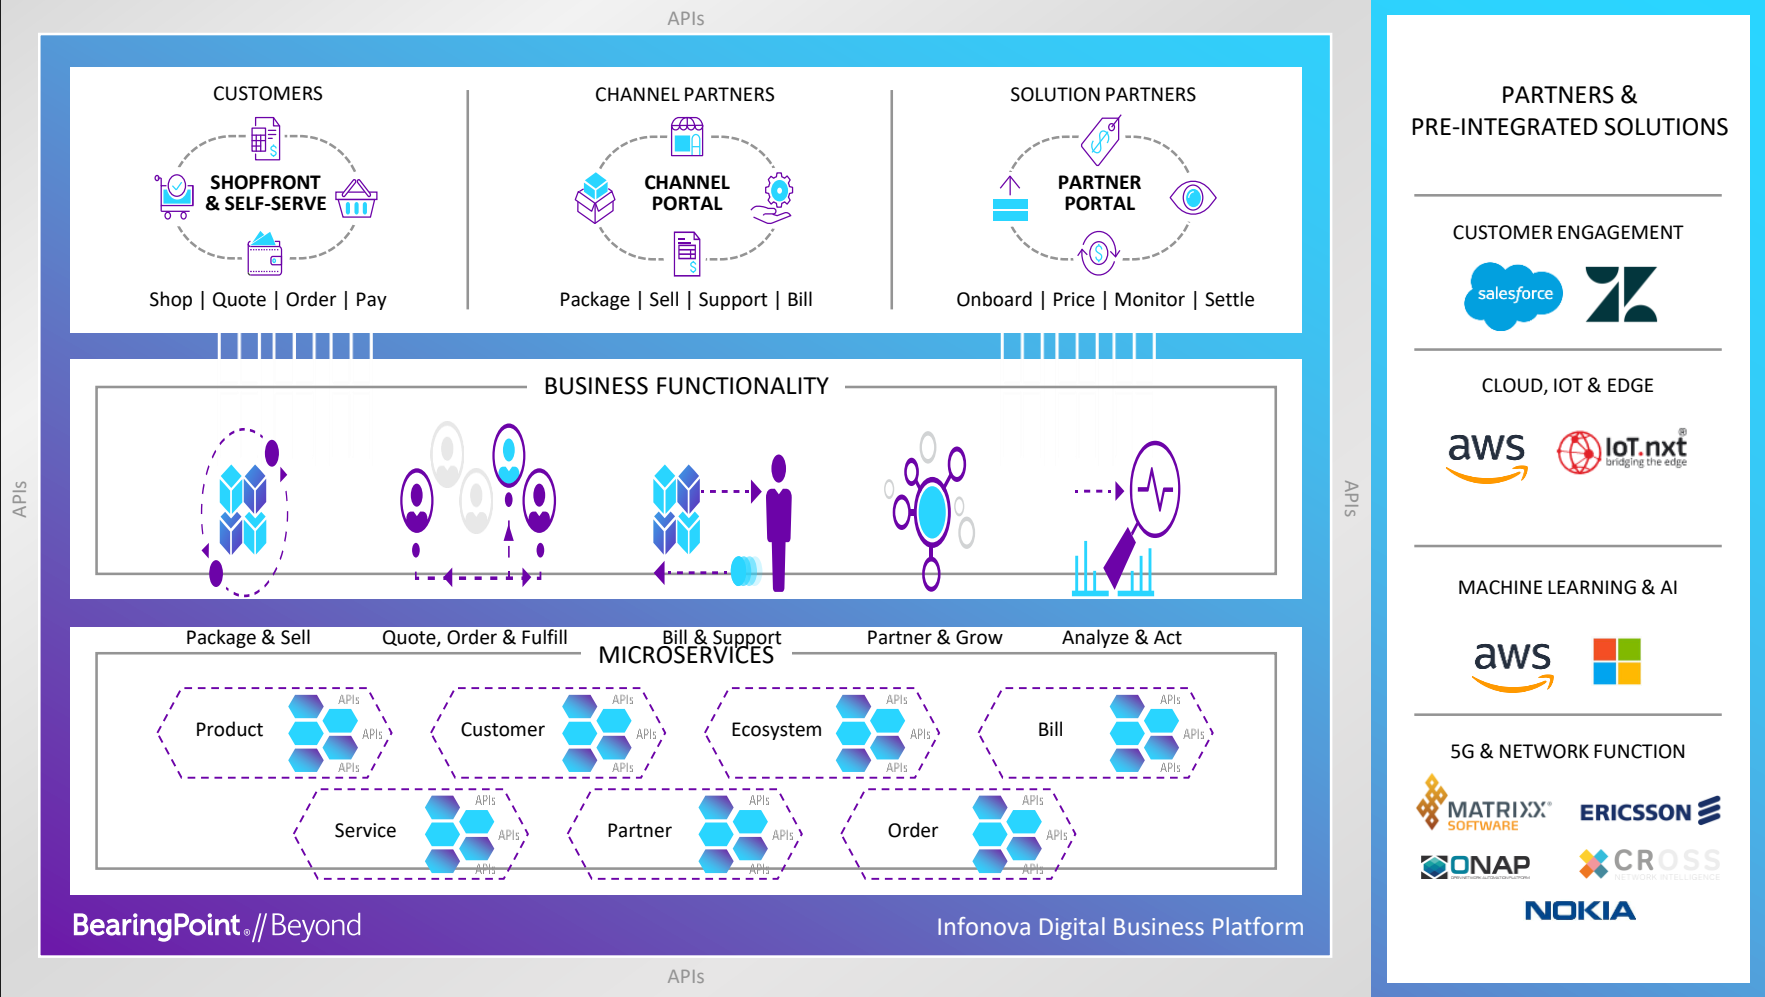

**We're powering our customers  
to launch new services and grow revenue at speed**

Our platforms are designed to help businesses experiment, monetize and orchestrate services while taking advantage of new technologies such as cloud, IoT, AI, 5G and more.

We enable organizations to co-create solutions with a growing network of partners; bringing them closer to their customers, helping them drive higher efficiency and automation, and becoming more agile in the face of competition.

# Infonova Digital Business Platform solutions

Delivered as a SaaS solution over AWS

# Beyond by BearingPoint

We help our customers grow their business using our digital platform

Usage of our Business Plattform:

## SAMPLE CUSTOMERS

## ANALYSTS

## AWARDS & CERTIFICATES

A global SaaS-based BSS and a **digital business platform provider**

**Powering our customers to grow revenue** and to reinvent their business models by utilizing the ecosystem

**Serving customers** across Asia-Pacific, Europe, Middle East and the Americas  
From telecommunications, media and entertainment, tech and IT, financial, and automotive

**Owned by BearingPoint** a leading Independent management and technology consultancy with European roots and a global reach

# Beyond by BearingPoint

## Who we are

### We have/are:

- Mostly technical background
- 7-8 years colleagues with us
- Big enough for exciting projects, small enough to oversee them

### Vision:

- We want to be the “Master platform”:  
Manage product catalog, processes, stores, etc.  
(not being an additional tool).
- Automation of conversation with other systems  
(not create every single process new every time)

### Spirit:

- What we do
- Friendships are formed
- Technological innovation in terms of big business customers
- International work
- Many roles and opportunities for development (*learn more after “techstack”*)

A low-angle, black and white photograph of several tall skyscrapers reaching towards a bright sky. The perspective creates a strong sense of height and scale, with the buildings' lines converging towards the top center. The sky is a pale, uniform grey, and the buildings' facades show intricate details of windows and structural elements.

# Our Techstack

# Beyond Container Based Techstack & the technical way we work in 5 minutes

Martin

# Our Agile Way of Working

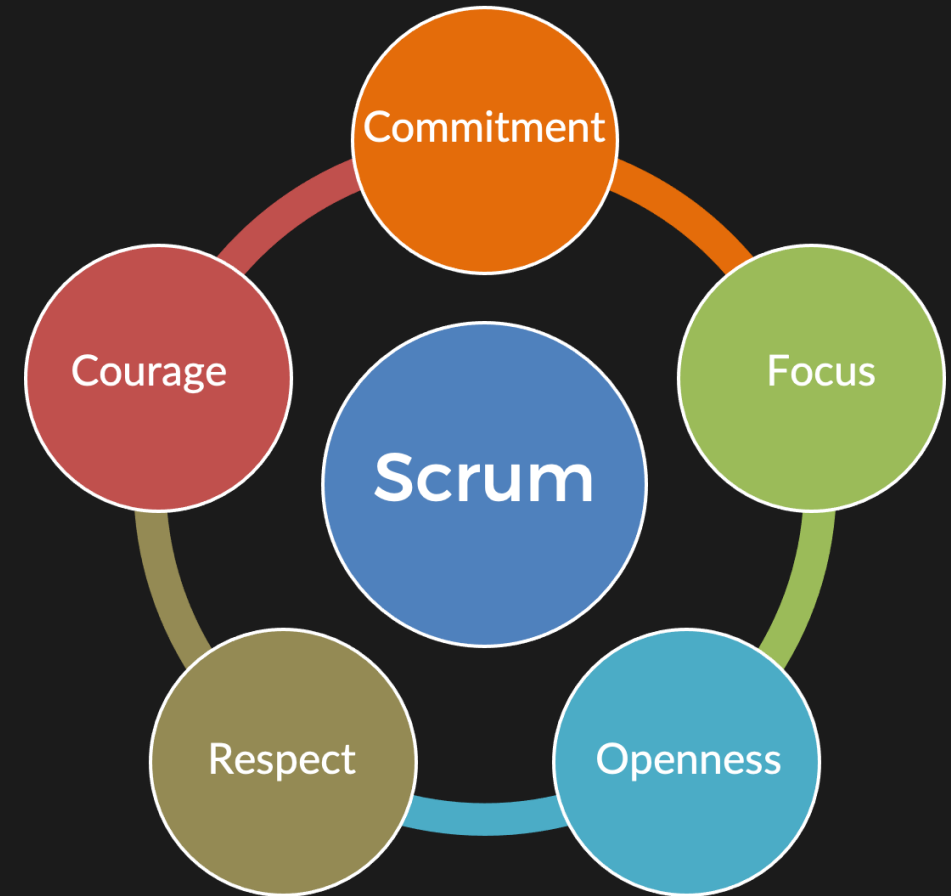

We deliver software in SCRUM teams

- Product development
- Client project delivery

Teams take responsibility for customer projects

10 Development teams in Graz

- Scrum Master
- Product Owner
- 5-7 Developers per team

<https://www.scrum.org/resources/blog/value-scrum-values>

# Our Software Development Standards

Software development is our core business

Using cloud native technologies to build scalable and reliable systems

Delivering business value with high quality

Continuously improve our processes and tools

# Our Container Based Technology Stack

## Application development

- Java
- Spring
- Angular

## Continuous Integration/Delivery

- Kubernetes
- Helm
- ArgoCD
- § Jenkins

## Development Tooling

- § Atlassian Stack (Bitbucket, Jira, Confluence)
- § IntelliJ IDEA

## PostgreSQL/Redis/Elasticsearch

Redis

Elasticsearch

by BearingPoint.

# Technologies

# Beyond Serverless Framework

Peter

# What is Serverless?

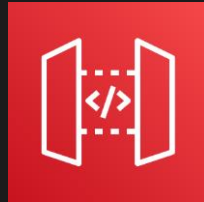

- Build and run applications without thinking about hardware
- With serverless computing, infrastructure management tasks like capacity provisioning and patching are handled by AWS, so you can focus on only writing code that serves your customers.
- Also known as Function as a Service
- BearingPoint uses AWS Serverless technologies for its integration projects

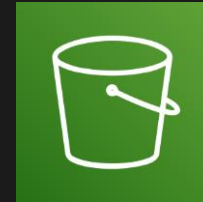

# Serverless toolset

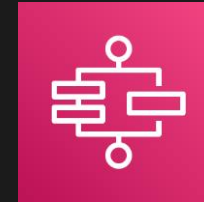

AWS Lambda

Amazon API Gateway

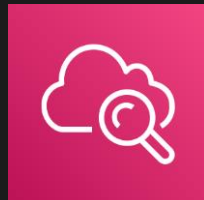

Amazon Simple Storage  
Service

AWS Step Functions

Amazon DynamoDB

Amazon CloudWatch

AWS Secrets Manager

AWS SAM

# What are the advantages of using serverless?

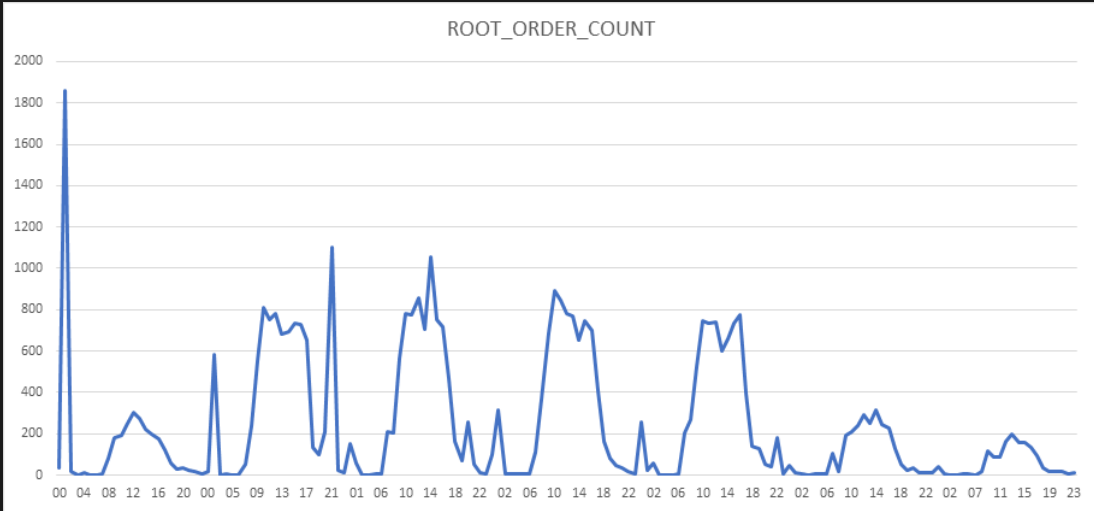

- No need to setup any infrastructure – all handled by configuration and serverless framework
- Zero administration – very important if we offer integrations as a service
- Flexible scaling – use the power of the cloud
- Pay only what you use
- Built-in high availability – 99.9999999% Uptime Guaranteed

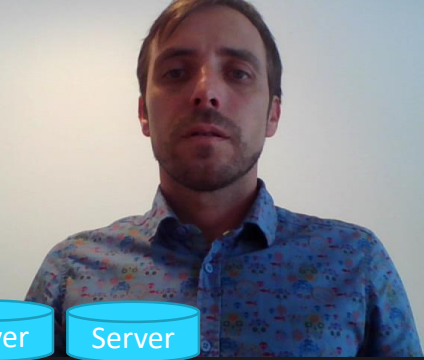

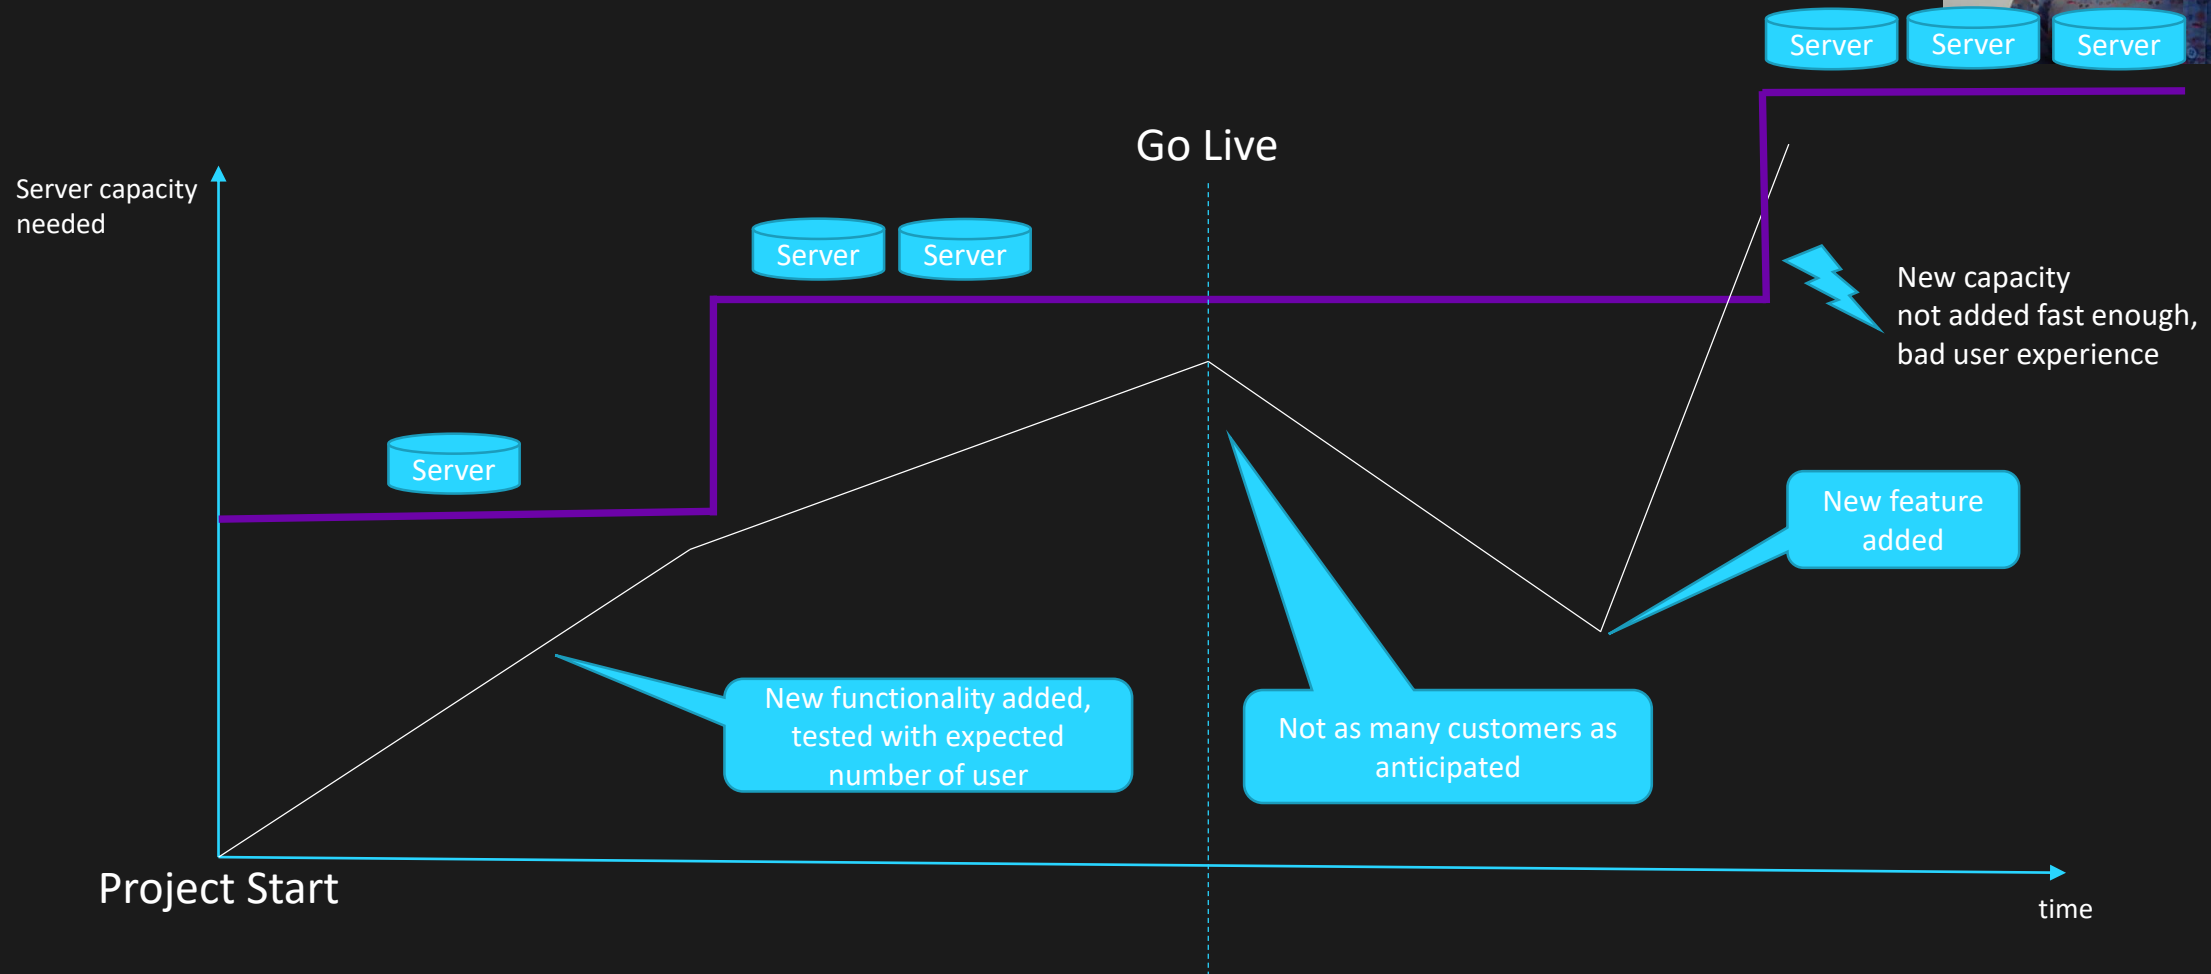

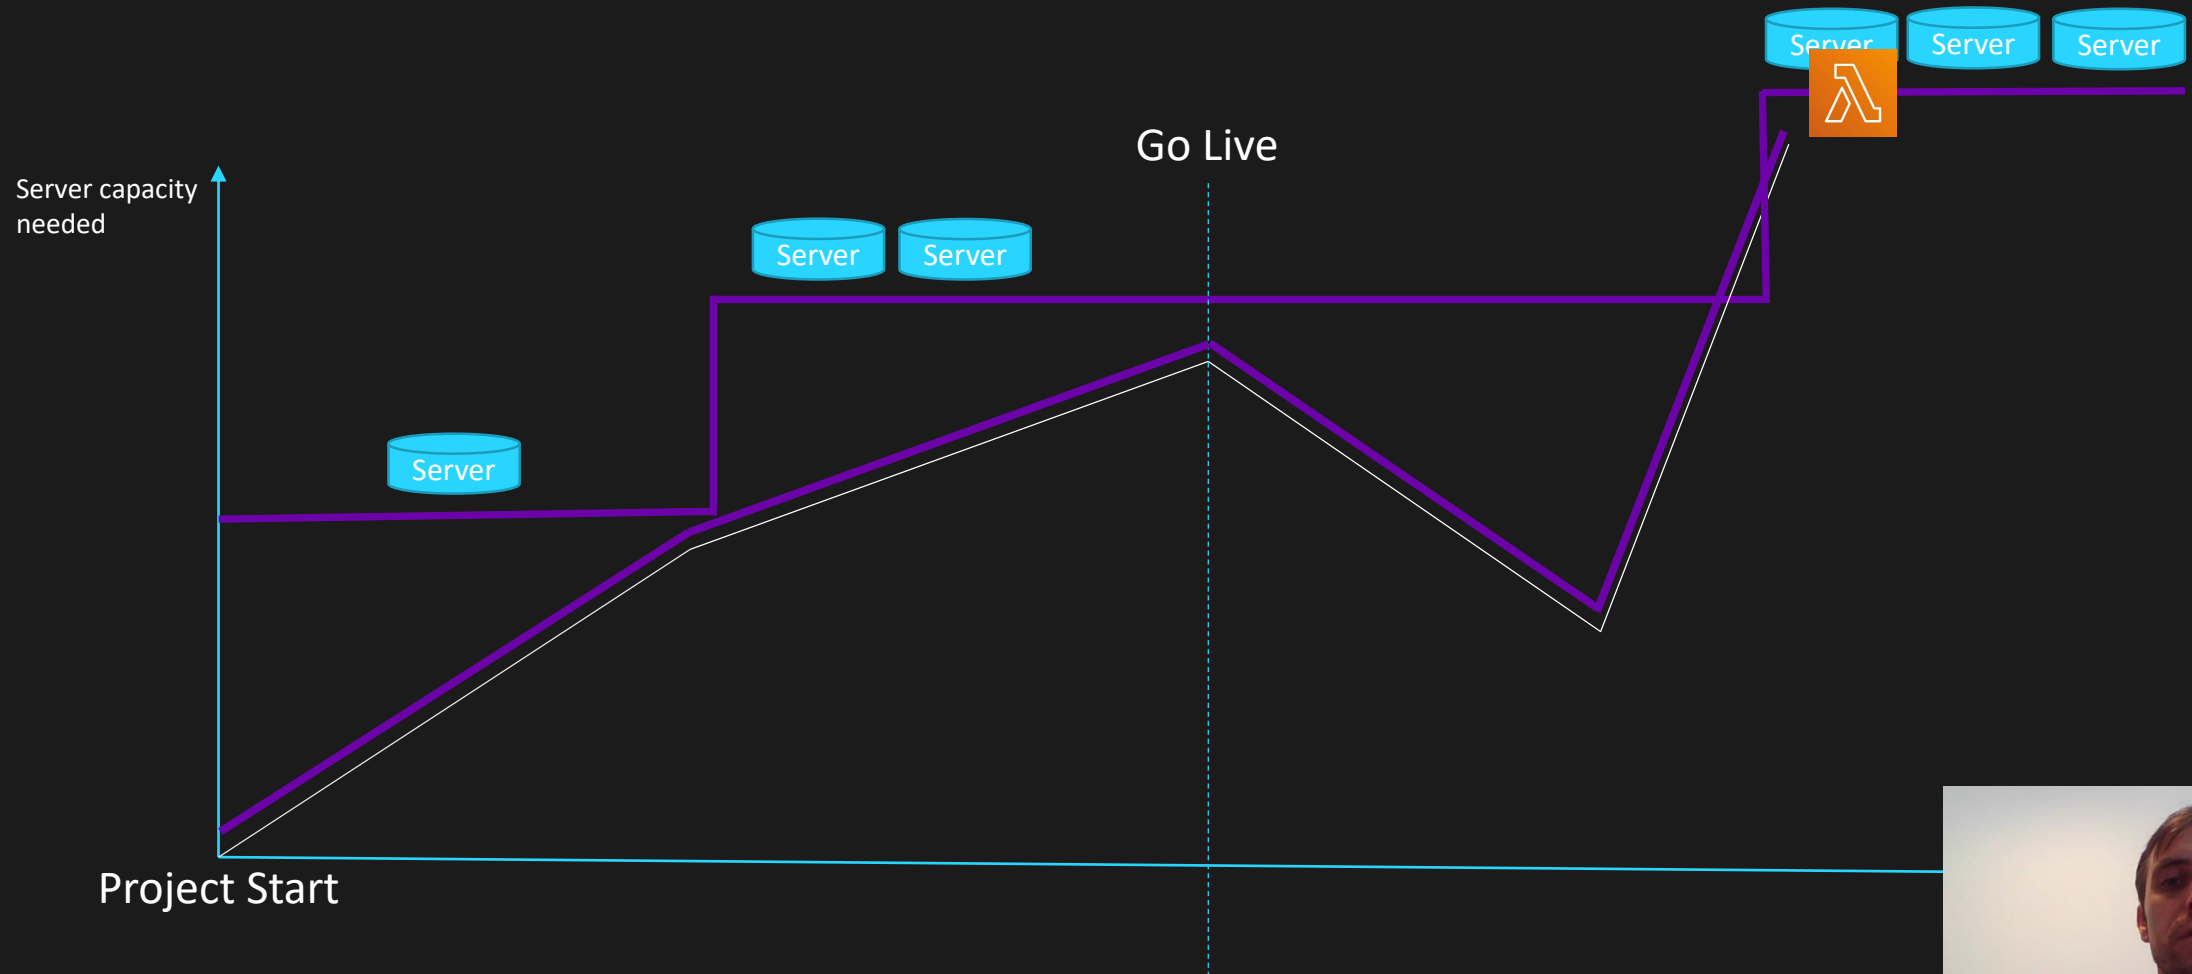

## Load generated for a customer during the day

# Integration Project Scaling - Traditional

# Integration Project Scaling - Serverless

A low-angle, black and white photograph of several skyscrapers reaching towards a bright light at the top center, creating a dramatic perspective. The buildings are covered in windows and structural lines.

# Roles & working at Beyond

Angelika

# Stand out from the crowd

## See what our team has to say about why they love working at Beyond:

[What's exciting about  
Beyond by BearingPoint is]  
'Working with bleeding edge  
technologies - using the  
latest technical solutions to  
meet customers' needs.'  
*(Manuel, Developer)*

'Cliché to say, I know, but  
it's a really good, relaxed  
and flexible working  
environment.'  
*(Matic,  
Product Owner)*

'[there are]  
Opportunities within  
[the] team to take on  
responsibilities and grow  
and succeed together'  
*(Sandra,  
Project Manager)*

'You just need the will to  
learn and to develop and  
you will find your spot in the  
company.'  
*(Nusa, Documentation  
Engineer turned  
Quality Engineer)*

## See what the last interns have to say about why they loved working at Beyond:

I was 100 % integrated  
in the team .

Team support was great.

Friendly working  
atmosphere.

There is flexibility  
and trust.

You can give Feedback  
within the Farewell  
Workshop.

I joined weekly  
meetings.

There are very  
interesting tasks.

We learned a lot .

Onboarding provides  
orientation.

HR accompanies you.  
Buddy is always there
