# COMPANY PROFILE

## **FOR A GREEN WORLD**

# The nature is our home.

Since our founding in 1930 we always strive to produce products of excellent quality without losing sight of the essentials.

With our products in the areas of irrigation and wastewater technology, we try to combine the highest possible efficiency with all aspects of environmental protection.

# We live environmental protection.

The topic of environmental protection is becoming more important every day. We have always been in a constant optimization process to save CO<sub>2</sub>, protect the environment and at the same time make our products even more efficient.

Our production plants in Voitsberg (AT) are already energy self-sufficient. Our e-car fleet is also constantly being expanded.

For a green world. For a green tomorrow.

# BUSINESS UNITS

## Pivot

- 75,000 installed spans globally
- Large areas
- Center
- Liner
- Center-liner
- Low pressure systems
- Hose and ditch feed
- Up to 1,000m<sup>3</sup>/ hour system capacity

## Hose Reel Machine

- 50,000 installed globally
- Compact and economic design
- Recognized quality, longevity and efficiency
- Normal and wide-range sprinklers
- 2 and 4 wheel undercarriages
- Irrigation computer Ecostar 6000
- Attractive price-performance ration

## Pipes, Fittings and Pumps

- HKS quick coupling pipes
- BAUER HK couplings
- Riser pipe couplings
- Known as strong, save and durable
- Sprinklers
- Carts
- Pumps with optimum performance

## Poly Tanker

- 9.000 installed globally
- 6.000 up to 26,000 liter capacity
- Laminate design
- Pump and high pressure tankers
- High pumping capacity

## Steel Tanker

- 51,000 globally installed
- 1,700 up to 28,000 liter capacity
- Galvanized
- Vacuum, pump and high pressure tankers
- High pumping capacity

## Pumps and Mixers

- Submersible pumps
- Long shaft pumps
- Electric and tractor mixers and agitators
- Adjustable cutter flange
- High quality chrome-steel
- Efficiency 30% higher than competition

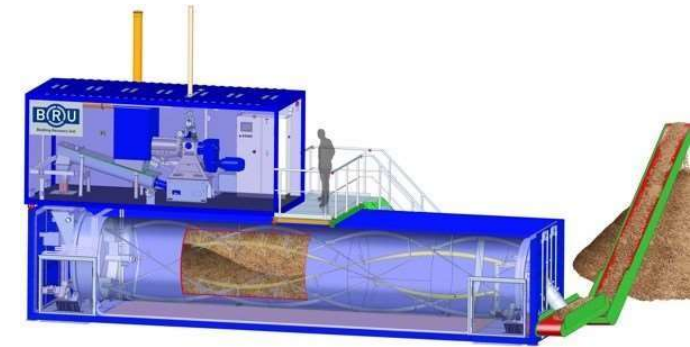

## Separators

- 10,000 installed
- Press Screw Separator (PSS)
- Filter Oscillating Separator (FOS)
- Centrifuge Cassifier Separator (CCS)
- Dissolved Air Flotation Unit (DAF)
- Huge reductions of waste volume (30%)

## Separator Green Bedding

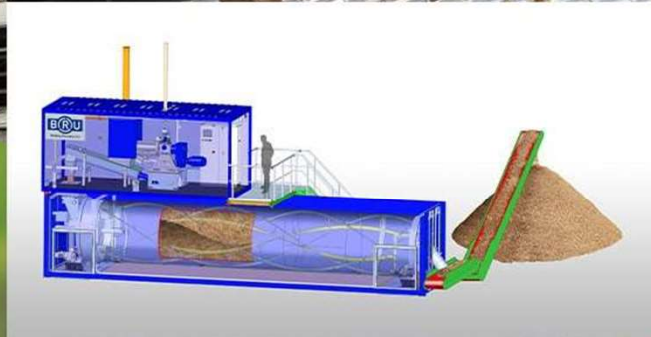

- Press Screw Separator to produce bedding material
- Dry matter content up to 36% in solids
- Production of cheap, harmless bedding by using the slurry existing on the farm
- High dry matter content even at high throughput rates
- Low energy consumption

## BRU – Bedding Recovery Unit

- Recovery of bedding material from slurry
- Patented technology
- Fully automated process
- One unit serves up to 400/1,000/2,000 cows
- Economical and environmentally friendly
- 100 units installed

A man with a beard, wearing a white t-shirt, carries a young child on his shoulders. The child, wearing a light blue shirt and sandals, points towards the sky. They are standing in a lush green field under a dramatic, cloudy sky at sunset or sunrise. In the background, a green tractor with a large tank and a harrow attachment is visible on the right side of the field.
