TECHHOUSE ACCELERATOR

TECHHOUSE ACCELERATOR is a 16-week accelerator program based in Graz, Austria.

During the program startups, tech teams, and students develop their organization, collaborate with industry partners on solving tech challenges, and connect with venture capitalists and investors.

To do so, we have created a program with two different acceleration tracks: One track that focuses on general acceleration topics and another that allows you to solve challenges together with industry clients

OUR GOAL

Support and nurture game-changing products, teams and companies in various stages of their development.

TECHHOUSE
ACCELERATOR >>>

ACCELERATION TRACKS

The Acceleration Topic Track focuses on **early-stage tech startups and non-founded tech teams** that develop interesting and innovative business models and technologies.

Acceleration Topic Track

We are looking for teams in the following acceleration areas:

- Sustainability
- Artificial Intelligence
- Industry 4.0
- Financial Services
- Health Tech

**Raiffeisen-Landesbank
Steiermark**

TATEN-Bank

The PoC-Track focuses on startups, tech teams, and students that will solve a **specific tech challenge** of one of our Industry-Partners from various backgrounds and industries. Teams can be both, incorporated startups, and non-founded tech and student teams, that have the goal to build a company.

Proof of Concept Track

We are looking for teams tackling the following challenges:

- Andritz: Smart supplier selection
- Hasslacher: Production efficiency in saw mills
- Österreichische Hagelversicherung: Smart harvest prediction
- Primetals Technologies: Digitalization of know-how and automation
- next-incubator: AI energy future
- Christof Industries: GreenHouseGas calculator
