

# COMPANY HISTORY

Picture was made in the year 1950.  
First living house including the workshop close to the former main road.

# ***Binderberger***

**Maschinenbau GmbH**

## **MAIN INFORMATION OF THE COMPANY BINDERBERGER AND STEPS OF GROWTH:**

- Founded in the year 1930 ( small locksmiths shop, repair station of machines and agriculture machines).
- Later production of agriculture machines and products (partner of Palfinger agriculture machines). They produced slurry mixers, slurry tankers and other different machines for the agriculture machine market.
- First production of forest machines was started in the year 1950.
- 1970 first production of wood splitters (conical splitters). At this time the company had 10 employees.
- 1990 the company bought the first welding robot for their production.
- 1995 Binderberger implement a flat – bed laser cutting machine from company TRUMPF. Number of employees increase to 25 people.
- 2004 Installation of the first metal tube/pipe laser cutting system from TRUMPF. It was a big advantage and part of modernization of the company.
- The growth of the company in the year 2000 was very quick. Binderberger start to use hot dip galvanize for the surface of the machines. In this time the forest business and the need of different forestry machines increased.
