SNOWLICIOUS Prinothのレストラン圧雪車

The concept

A PRINOTH snow groomer, a professional kitchen, and a top chef. These are three very important ingredients for a top-class outdoor culinary experience ... Right where people are on holiday, relaxing, busy in their favorite activities or away from the hustle and bustle of everyday life in the search for new and exciting experiences. SNOWLICIOUS is a food truck on a snow groomer, following in the footsteps of a modern service philosophy: quality, fast and easy.

The platform consists of a converted PRINOTH snow groomer with an incorporated professional kitchen. Dishes are prepared and served fresh on the spot, as you would expect from a legendary food truck. The recipes are the creations of the renowned Italian chef Andrea Campi, who is also the inventor of SNOWLICIOUS and a champion of fine cuisine "Made in Italy."

Unlike a truck, the PRINOTH tracked vehicle is perfect for use on the most diverse terrains. It moves smoothly on snow and sand, can reach event locations at almost any altitude and is extremely resistant regardless of the weather. From beach parties to ski slopes, from fair grounds to festivals, the SNOWLICIOUS food truck makes a great impression.

Unforgettable feelings are the ingredients of memories. SNOWLICIOUS is the ideal concept for event and brand presentations because, on the one hand, its platform always ensures the same high standard of excellence and, on the other hand, it can be easily adapted to any business standards and target group. SNOWLICIOUS is the ideal marketing tool that can cover plenty of ground with almost no effort.

The look and design of the snow groomer are highly customizable so that it can perfectly match the corporate design of a brand or company. But also the original design of the SNOWLICIOUS food truck becomes a tangible added value for the public attending events. Thanks to the culinary experience it offers and the ability to reach unique locations, SNOWLICIOUS is also the perfect anchor for innovative storytelling.

The SNOWLICIOUS concept stands out on the snow, as well as at the beach or in any urban setting, making it the hotspot for any event and an authentic brand ambassador. Whether you hire or purchase the SNOWLICIOUS snow groomer, you will always receive the same unique all-round service. Off to new destinations!
