

Prof. Dr. Johannes Drach – Head of the Cancer Center

## Comprehensive Cancer Care Vienna

Our mission is to provide the best possible treatment to patients diagnosed with cancer quickly, unbureaucratically and in accordance with highest international standards.

The Center offers comprehensive diagnostics and treatment for adult patients, particularly for following indications:

- **Breast cancer**
- **Prostate cancer**
- **Tumors of the digestive tract**
- **Lung cancer**
- **Gynecologic cancers**
- **Kidney, bladder cancer**
- **Liver cancer**
- **Hemato-oncology**
- **Sarcomas**

In **diagnostics** we rely on latest imaging technologies, endoscopic procedures, co-operation with specialized pathology laboratories.

“**Tumor profiling**” using newest molecular methods enable precise categorization of tumors according to their molecular properties, which forms the basis for **personalized treatment**.

**Interdisciplinary co-operation** between specialists of all involved disciplines is crucial for successful treatment. Every case is discussed and planned in regular expert meetings, so-called “**tumor boards**”.

**Modern drug therapy** involves chemotherapy – which is nowadays much more tolerable – as well as targeted antibody therapies and molecular tumor therapies. More and more patients benefit from **personalized therapies**.

**Modern surgery methods** allow for minimally invasive operations in many cases – major and highly stressful operations are increasingly becoming a thing of the past.

Our Center attaches great importance to **cooperation with leading institutes** in Vienna, such as specialist laboratories and radiation therapy institutes.

# Our specialists

Our Center has a large network of renowned experts that it can call upon depending on the individual case. Many of these specialists have international experience and are involved in pioneering scientific studies in the field of cancer research.

## Hematology and internal oncology

- Prof. Dr. Johannes Drach
- OA Dr. Ernst Ulsperger
- Prof. Dr. Thomas Brodowicz
- Prof. Dr. Alexander Gaiger
- Prof. Dr. Markus Raderer
- Prof. Dr. Gerald Prager

## Urology, Uro-oncology

- Priv.-Doz. Dr. Markus Margreiter
- Prof. Priv. Doz. Dr. Mesut Remzi
- Prof. Dr. Wilhelm Hübner

## Nuclear medicine

- Prof. Dr. Marcus Hacker
- Prof. Dr. Werner Langsteger

## Gynecologic oncology

- Prof. Dr. Christian Kainz
- Doz. Dr. Michael Medl
- Prof. Priv. Doz. Dr. Rupert Bartsch
- Prof. Dr. Daphne Gschwantler-Kaulich
- Prof. Dr. Fritz Nagele
- OÄ Dr. Silvia Artner

## Surgery

- Prof. Dr. Michael Rolf Müller
- OA Dr. Philipp Beckerhinn
- Prof. Dr. Raimund Jakesz
- Prof. Dr. Thomas Bachleitner-Hofmann
- Prof. Dr. Klaus Kaczirek
- Prof. Dr. Michael Stierer
- Prof. Dr. Thomas Grünberger

## Radiation oncology

- Prim. Dr. Claudia Steffal

## Orthopedic oncology

- OA Dr. Farshid Abdolvahab

## ENT oncology

- Prof. Dr. Michael Formanek
- OA Dr. Franz Windisch

## Gastroenterology, endoscopy

- OA Dr. Marcus Franz

## Thyroid cancer

- OA Dr. Katayou Tonninger-Bahadori

## Interventional radiology

- Ass. Prof. Priv. Doz. Dr. Florian Wolf

## Support and care

- Patients are cared for by their personal attending doctor during the whole diagnostic and treatment process.
- Patients receive comprehensive treatment in order to improve their well-being and reduce side effects to a minimum.

## Cancer prevention and early detection

- Comprehensive health screening checks ("check-ups") are offered at Mavie Med hospitals with the aim of prevention or early detection of cancer diseases.
- Many types of cancer can be successfully treated in an early stage.

## Second opinion

- Patients diagnosed with cancer are offered the opportunity to have the diagnosis checked by top specialists.
- Second opinion is offered both at the hospital as well as remotely.

## Flexible organization

- Appointments with specialists can be made at short notice.
- Patients receive expert medical support and access to state-of-the-art diagnostics and treatment options promptly.
