Our office in Riyadh is part of a network of more than 110 offices in over 70 countries that provide a broad range of intelligence and business development services for both Austrian companies and their international business partners.

Our team of experts can assist Saudi companies in locating Austrian suppliers and business partners. We organize numerous events every year to bring business contacts together. Other services provided by our office range from introductions to Austrian companies looking for importers, distributors, or agents to providing in-depth information on Austria as a business location and assistance in entering the Austrian market.

PREFACE

On behalf of Advantage Austria, it is my great pleasure to introduce to you four Austrian companies.

They are taking part in the Saudi Build from November 14th to 17th 2022. This is one of the follow-up events of the Trade Mission alongside the visit of the Austrian Minister for Digital & Economic Affairs, Margarete Schramböck, and the 8th meeting of the Austrian-Saudi-Arabian Joint Commission on Economy, Trade, Industry and Technology in Riyadh in March 2022.

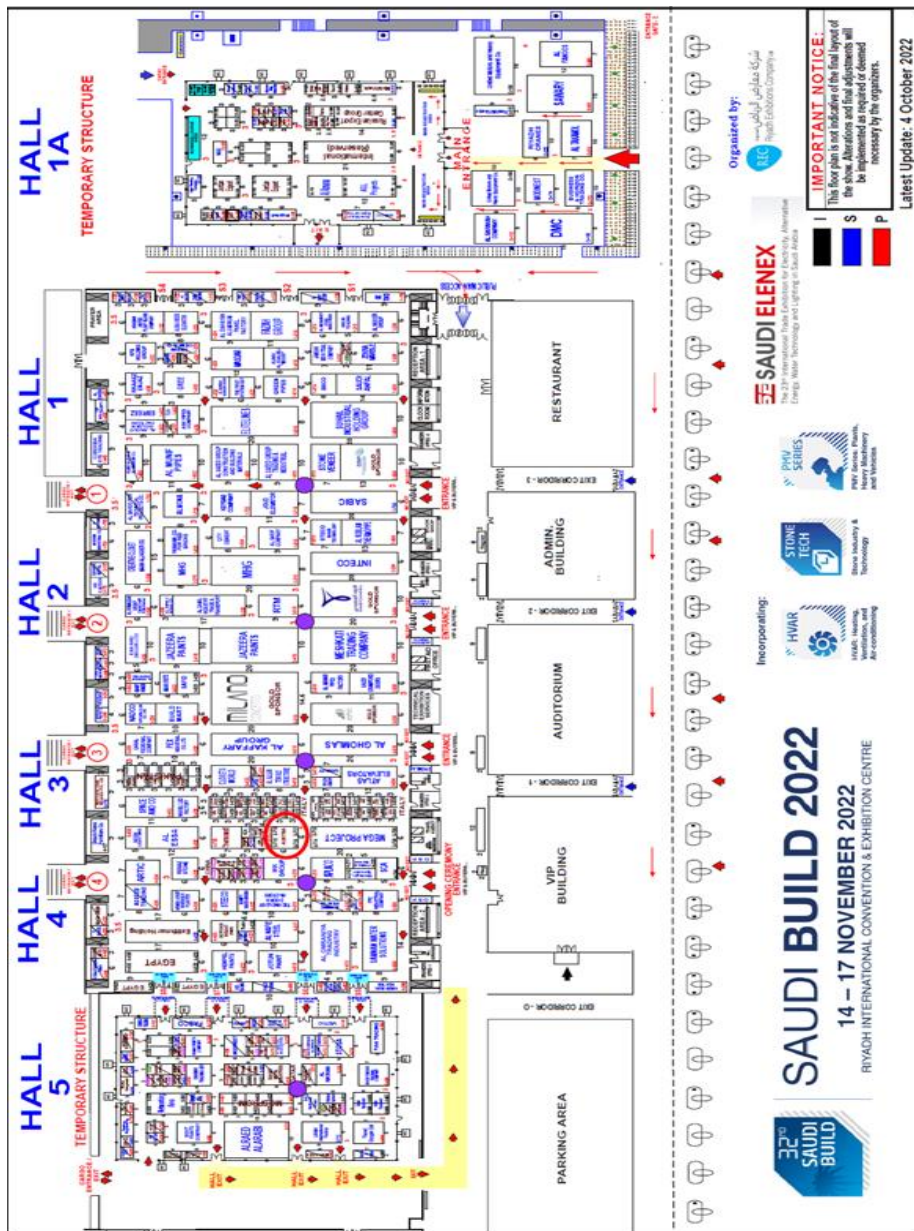

The trade delegation in March was headed by Dr. Richard Schenz, Vice-President of the Austrian Federal Economic Chamber. Aside from official visits a Business & Investment Forum took place in Riyadh and a Business Forum Eastern Province in Dammam.

This year we are proud to present you a broad range of Austrian technologies described in more detail on the following pages. The participating Austrian companies are what we call “hidden champions” each pertaining to their special niche.

I trust this event will find your interest. Wishing you interesting and fruitful talks with the representatives of our Austrian companies.

Christoph Pfeifer

Commercial Counsellor at the Austrian Embassy
Head of Advantage Austria in Saudi Arabia

Imran Holding as an engineering firm and authorized partner of ALLPLAN Precast, the global provider of BIM solutions to the AEC industry, Imran Holding covers the entire design and construction process: from initial design to detailed construction design and prefabrication. Allplan Precast is Imran Holding's pre-fabrication competency center, providing customized solutions for the turnkey industry. With powerful tools, precast concrete manufacturers and engineers achieve new levels of quality, efficiency, and precision in their design and planning processes. Our turnkey solutions support you at all stages of a project: from impressive 3D quotation models to quality-assured production data. We offer integrated building systems with modern concrete technology.

Prefabricated, innovation, engineering, industry.

We are looking for project partners and provide them with modern construction systems. The goal is to build fast, high-quality, and environmentally friendly buildings.

Partner search for the implementation of innovative ideas in construction.

Planning orders for innovative construction projects,

License marketing of innovative building systems in the precast sector.

REBLOC develops, produces and markets modern precast concrete vehicle restraint systems to enhance road safety worldwide. All systems are extensively tested according to international standards with real-life crash tests.

Continuous research and innovations ensure that the safety barriers feature the latest technology and meet the most stringent safety specifications.

With an extensive product range and more than 200 full-scale crash tests, REBLOC is a leading expert on precast concrete barriers with a worldwide partner network.

REBLOC® VEHICLE RESTRAINT SYSTEMS

REBLOC's mission is to develop modern precast concrete safety barriers providing highest safety for worldwide highways. Numerous construction sites all over the world have already been successfully realized and business is continually expanding to new countries and markets.

Therefore REBLOC is looking for partners, who want to apply or distribute the permanent or temporary systems in their markets.
