PREFACE

Michael Friedl

The Austrian Commercial Counsellor
ADVANTAGE AUSTRIA Bangkok

Welcome to the Future of Rail – with a Touch of Austrian Precision.

Thailand's railway sector is on the move – quite literally. With major investments in high-speed rail, mass transit systems, and freight infrastructure, the country is laying the tracks for a more connected, efficient, and sustainable future. And where there are ambitious rail projects, Austria is never far behind.

Renowned for our engineering excellence and alpine-tested technology, Austria is proud to be part of this exciting journey. That's why three top Austrian companies have made the journey to exhibit here in Bangkok – bringing innovation, reliability, and a bit of alpine flair to the show floor.

We warmly invite you to visit the Austrian Pavilion, meet our experts, and discover how Austrian know-how can support Thailand's bold railway ambitions. Whether you're looking for advanced components, smart systems, or simply good conversation over strong coffee – you'll find it with us.

See you at the Austrian Pavilion – we're on the right track!

Area Sales Manager, Asia Pacific
E fang.xin@getzner.com

Getzner Werkstoffe is a global leader in vibration isolation and elastic solutions for the railway and construction sectors. The Austrian company specializes in high-performance polyurethane materials, such as Sylomer® and Sylodyn®, which effectively reduce vibrations, noise, and maintenance costs in railway infrastructure. Its Mass-Spring Systems (MSS), also known as Floating Slab Track (FST), provide superior vibration isolation for metro and high-speed rail, protecting superstructures and the surrounding environment. Under Sleeper Pads (USP) enhance track stability and extend ballast lifespan, while Under Ballast Mats (UBM) minimize dynamic forces for smoother and more efficient operations. With its advanced elastic solutions made from in-house developed polyurethane materials, Getzner ensures quieter, more durable, and sustainable railway networks worldwide.

We are looking for projects and business opportunities in the railway and construction sectors.

**GMUNDNER

Company BODAN, founded in 1972 in Ohlsdorf is specialized on manufacturing, delivery and installation of level crossing systems.

With a team of 60 employees and multiple international agents we support and contribute goods and solutions to track / road owners in order to shorten issues or disturbances and increase the comfort for vehicles while track break time is reduced.

Due to our engineering team we generate customized products that eliminate the disadvantages of rubber or prestressed steel panels while multiple advantages to the track, the road and the users of both are enabled.

Product quality and a enormous life time of the system paired with low life cycle and maintenance costs create additional benefits for the proprietor.

We are looking for a local sales partner as well as new projects regarding level crossing systems.

voestalpine Railway Systems, a subsidiary company of voestalpine AG, is the global leader for railway infrastructure system solutions, offering outstanding products, logistics and services for rails, turnouts, signaling and monitoring applications. As the global track technology company and full-range supplier, we offer our customers throughout the world fully integrated railway solutions for all types of rail traffic. Creating maximum customer benefit is the driving force behind all our activities.

We have contributed decisively to the development of modern, digital railway systems by deploying modern signaling and monitoring technologies to increase existing capacity and safety as well as lower the costs.

As a leading manufacturer of railway infrastructure, we understand how essential it is for our customers to gain a comprehensive understanding of the functionality, maintenance, and servicing of railway assets to ensure maximum track availability and operational reliability. With the voestalpine Railway Systems Academy, we want to offer our customers, partners, and interested parties an additional benefit, in addition to our product-, service-, and system solutions. Our trainers and experts train, coach, and advise in the fields of rail-, turnout-, signaling-, and monitoring technologies and in services related to all aspects of the railway infrastructure. Our training programs combine deep technical insights with hands-on practice, enabling participants to effectively bridge the gap between theory and real-world application. In an era of rapid market changes and technological advancements, Campus Bangkok stands as your trusted partner in developing and maintaining cutting-edge expertise.
