## PREFACE

**Michael Friedl**

The Austrian Trade Commissioner /  
Commercial Counsellor

Austrian Embassy – Commercial  
Section (ADVANTAGE AUSTRIA  
Thailand)

Welcome to the Future of Rail – with a  
Touch of Austrian Precision.

Thailand's railway sector is on the move – quite literally. With major investments in high-speed rail, mass transit systems, and freight infrastructure, the country is laying the tracks for a more connected, efficient, and sustainable future. And where there are ambitious rail projects, Austria is never far behind.

Renowned for our engineering excellence and alpine-tested technology, Austria is proud to be part of this exciting journey. That's why six top Austrian companies have made the journey to exhibit here in Bangkok – bringing innovation, reliability, and a bit of alpine flair to the show floor.

We warmly invite you to visit the Austrian Pavilion (booth E04), meet our experts, and discover how Austrian know-how can support Thailand's bold railway ambitions. Whether you're looking for advanced components, smart systems, or simply good conversation over strong coffee – you'll find it with us.

See you at the Austrian Pavilion – we're  
on the right track!

<https://www.BOXmover.GmbH>

BOXmover develops and industrializes modern freight wagon solutions based on a modular engineering approach. The focus is on efficient wagon structures that can be produced economically, assembled flexibly and adapted to different logistics applications.

By combining engineering expertise with manufacturing-oriented design, BOXmover enables scalable industrial production concepts for freight wagons suitable for international cooperation.

BOXmover stands for modular railway engineering focused on efficient industrial manufacturing and flexible logistics solutions.

© BOXmover GmbH

### **BOXmover – Smart Modular Railway Engineering for Efficient Manufacturing**

The BOXmover BaseFrame is a modular freight wagon platform based on a TSI-compliant wagon frame. Interchangeable superstructures allow different transport applications to be implemented on a common technical platform.

The concept is built on three pillars: engineering of modular wagon structures, manufacturing-optimized design for efficient industrial production, and licensing of technology and design, enabling international partners to manufacture BOXmover systems locally.

Getzner Werkstoffe is a global leader in vibration isolation and elastic solutions for the railway and construction sectors. The Austrian company specializes in high-performance polyurethane materials, such as Sylomer® and Sylodyn®, which effectively reduce vibrations, noise, and maintenance costs in railway infrastructure. Its Mass-Spring Systems (MSS), also known as Floating Slab Track Systems (FST), provide superior vibration isolation for metro and high-speed rail, protecting superstructures and the surrounding environment. Under Sleeper Pads (USP) enhance track stability and extend ballast lifespan, while Under Ballast Mats (UBM) minimize dynamic forces for smoother and more efficient operations. With its advanced elastic solutions made from in-house developed polyurethane materials, Getzner ensures quieter, more durable, and sustainable railway networks worldwide.

**We are looking for** projects and business opportunities in the railway and construction sectors.

# NETBEE

## ForceBEE

© NET-Automation GmbH

Discover ForceBEE – the first system enabling direct brake force measurement directly at the point of action in rail vehicles.

Reduce testing time by up to 75%, achieve ROI within just 3 months, and unlock savings of up to €6 million over 5 years (based on 140 vehicles).

Using ultra-thin sensor technology placed between pad and disc, ForceBEE delivers real, objective data under real workshop conditions.

### BRAKE FORCE MEASURING DEVICE FOR RAIL VEHICLES

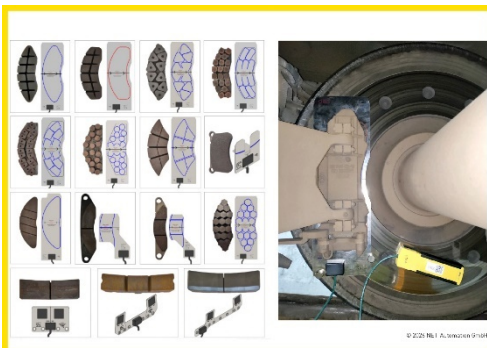

NETBEE  
ForceBEE

© 2021 Net Automation GmbH

- Direct measurement of real brake force for the first time
- Up to 45 measurement points per vehicle
- No dismantling, no mechanical intervention
- Fast, mobile, and wireless system
- Significant cost savings and increased fleet availability

© NET-Automation GmbH

© 2021 Net Automation GmbH

ForceBEE transforms brake testing into a fast, digital, and data-driven process – enabling condition-based maintenance and a new level of efficiency in rail operations. Our customers include Pacific National Rail (Australia), ÖBB (Austrian Federal Railways), SNCF (French National Railways), and Stadler Rail.

voestalpine Railway Systems, a subsidiary company of voestalpine AG, is the global leader for railway infrastructure system solutions, offering outstanding products, logistics and services for rails, turnouts, signaling and monitoring applications. As the global track technology company and full-range supplier, we offer our customers throughout the world fully integrated railway solutions for all types of rail traffic. Creating maximum customer benefit is the driving force behind all our activities.

We have contributed decisively to the development of modern digital railway systems by deploying modern signaling and monitoring technologies to increase existing capacity and safety as well as lower the costs.

## **zentrak - Digital solutions for monitoring, assets, and maintenance.**

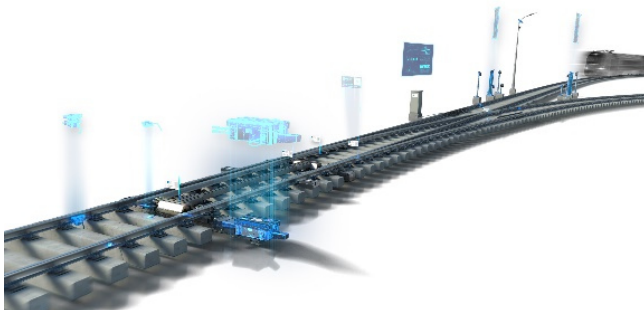

zentrak is voestalpine Railway Systems' integrated digital platform for monitoring, asset intelligence, and maintenance management. It transforms data into actionable insights, supporting safer, more efficient, and future ready railway infrastructure.

By continuously analyzing asset condition data, zentrak enables predictive and prescriptive maintenance strategies, replacing reactive approaches and improving reliability across the entire lifecycle. Advanced technologies provide a comprehensive view of assets—past, present, and future—helping optimize performance and reduce downtime.

Combining global hardware and software expertise, zentrak supports high performing rail networks worldwide.

## **Austoroll® - rollers for railway switch blades and swing nose crossings.**

Austoroll is a trademark of the international Wieland Group. With the consistent development of the "rolling instead of lubricating" concept, these high-quality rollers set an international standard for maintenance free roller devices.

Austoroll saves up to 25 liters of lubricant per year and point. Inefficient and labor-intensive slide chair lubrication is a thing of the past. A unique and robust design make them to the only permanent flexible switch point roller on the market. More than 300,000 units are successfully in use by our customers worldwide.

### Your Benefit:

- Optimizes the track availability
- The only permanent flexible roller system worldwide
- 100 % maintenance-free
- Amortization period less than two years Easy installation – also possible during train breaks
- Remains in the track during tamping, grinding or milling
- Up to 60 % reduction of throwing forces
- Personal service and installation training
- For any switch blades and moveable frogs
- 30 years' experience

Increase your track availability – with Austoroll®. Quality from Austria.

**ADVANTAGE AUSTRIA** is the trade promotion organisation of the Austrian Federal Economic Chamber. With around 100 offices in over 70 countries, we provide a broad range of intelligence and business development services for both Austrian companies and their international business partners. Around 800 employees around the world can assist you in locating Austrian suppliers and business partners. We organize about 1,200 events every year to bring business contacts together. Other services provided by ADVANTAGE AUSTRIA offices range from introductions to Austrian companies looking for importers, distributors or agents to providing in-depth information on Austria as a business location and assistance in entering the Austrian market.
