Dear partners and friends of ADVANTAGE AUSTRIA Chicago,

I hope you all had a great start to the New Year! Spring has almost sprung and we have some exciting events planned for the next couple of months.

We will have an Austrian Pavilion at the NPE International Plastics Showcase taking place May 7 - 11, 2018 in Orlando, Florida. 9 companies will showcase the latest technologies and innovations in the area of plastics processing machinery, mold making, recycling machines, etc. Take this opportunity to find out about top products and trendsetting technologies of the Austrian plastics industry at NPE 2018.

We are currently in the process of organizing a group of U.S. experts in the aerospace industry and engineering to visit Austria within the framework of the George C. Marshall Visit to Austria. The trip will again feature meetings with federal and regional government officials, briefings by relevant agencies and site visits to best practice projects in Austria.
And it's never too early to mark your calendars for our annual AUSTRIA CONNECT Conference for Executives of Austrian Subsidiaries. This year's event will take place in Toronto September 21 - 22, 2018.

From all of us, thank you for your trust in Austria, Austrian companies and products and for your friendship and support in creating more bridges between our two countries!

With best wishes,

*Peter Sedlmayer and the team of ADVANTAGE AUSTRIA Chicago*

And here a brief update on the economic situation in the EU in general:

**Commission report: Employment and social situation in the EU continues to improve**

Backed by robust economic growth, employment in the EU continued to rise more strongly than expected in the third quarter of 2017, while unemployment figures declined further according to the latest Quarterly Review on Employment and Social Developments in Europe.

Compared to a year before, EU employment rose by 1.7%. This corresponds to an additional 4 million people employed, of which 2.7 million in the euro area. Permanent jobs and full-time employment were the main contributors to this expansion. Between the third quarter of 2016 and 2017, the number of employees with permanent contracts grew by 2.8 million. This increase is three times higher than the rise in temporary contracts (900,000). The number of full-time workers surged by about 3 million, up to 181 million, while part-time workers increased by about 300,000 up to 42.7 million.

**WHAT’S BEEN HAPPENING RECENTLY**
