The World visits Vienna

The ISWA World Congress is one of the world’s most important congresses in the field of waste management. From 7 to 11 October 2013, Vienna expects up to 1,000 experts, decision makers and visitors from around the world. The congress is organized by the City of Vienna, MA 48, in cooperation with the International Solid Waste Association (ISWA).

Welcome to Vienna!

Life is good in Vienna – for the third time in a row the 2011 Mercer study ranked Vienna first in a survey of the best places to live. The city has more green space than virtually any other, an excellent infrastructure and is one of the safest major cities on earth.

Vienna is the only metropolis in the world that grows enough wine within city limits to be worth mentioning. And the Viennese coffee house is known around the globe for its informal pleasantness, as an oasis of gemütlichkeit.

A stroll around Vienna takes you back to imperial times – the historic city center is a UNESCO world cultural heritage site. Vienna boasts 27 palaces and 163 other residences – examples of the city’s illustrious history await on virtually every street corner.

About the Organizers

MA 48 – Waste Management, Street Cleaning and Vehicle Fleet

MA 48 (Municipal Department 48) is part of the Vienna City Administration. The department is responsible for municipal waste collection and treatment, street cleaning and winter services. 3,500 employees are engaged every day to keep Vienna clean, and to ensure a high quality of life for its citizens. Waste that cannot be avoided is optimally disposed of – it is collected in over 400,000 garbage containers, 17,000 trash cans and 19 waste collection points. Salvage materials like paper, glass and plastic bottles are collected and disposed of separately, as is organic waste. Non-recyclable and bulky wastes are treated thermally and subsequently deposited in the department’s own environmentally compliant landfill.

As many as 100 national and foreign delegations visit Vienna each year to learn about the city’s waste management program. As a result, organizing international waste management congresses has a long tradition at MA 48.

ISWA – International Solid Waste Association

ISWA – the International Solid Waste Association – is a global, independent and non-profit making association working in the public interest to promote and develop sustainable waste management. ISWA has members in more than 80 countries and is the only worldwide association promoting sustainable, comprehensive and professional waste management.

The Association is open to individuals and organizations from the scientific community, public institutions and public and private companies from all over the world working in the field of and interested in waste management.

Being part of ISWA gives you an unparalleled access to international organizations. Through its working groups, ISWA helps these international organizations form policy by supplying technical papers and opinions regarding waste practices.

Become a Sponsor

Take the unique opportunity to become a sponsor of the ISWA World Congress and present your organisation or company and services to an international, high-profile audience in Vienna. The ISWA World Congress offers the perfect setting for networking and direct contact with potential customers as well as numerous decision makers from government, science and industry.

For detailed information concerning sponsorship please contact:
Peter Frybert
E-Mail: peter.frybert@wien.gv.at

Update and exchange Knowledge

During the ISWA World Congress from 7 to 11 October 2013, Vienna will take center stage in the international solid waste management community. Visit the ISWA World Congress 2013 at the Vienna Exhibition Center (Messe Wien). Update your knowledge on the latest trends and developments in waste management by attending scientific presentations, visiting exhibition stands and taking tours of modern companies. Make use of the extensive program to exchange knowledge, gain new contacts and foster business relationships.
